

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Angola. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting moment in your life — congratulations on finishing primary school! 🎉
Let's break this down so I can give you some useful recommendations.

📌 Things to consider

Since you've just finished primary school (folkeskolen), the most common next steps in Denmark depend on your interests, strengths, and future plans. Here are your main options:

1 Gymnasium (General Upper Secondary Education)

If you enjoy academic subjects (like languages, science, or humanities) and are considering university later, this is a good path. There are several types:

- **STX (studentereksamen)** – General academic focus (languages, science, humanities, social science)
- **HHX (higher commercial exam)** – Focus on business, economics, and international relations
- **HTX (higher technical exam)** – Focus on technology, natural sciences, and IT
- **HF (higher preparatory exam)** – Shorter (2 years), more practical focus, good if you want to move on faster to a specific field

👉 When to choose this?

- You like academic subjects.
- You think you might want to go to university or higher education.
- You're unsure and want to keep your options open.

2 EUD / EUX (Vocational Education and Training)

If you'd rather learn a trade or get practical skills while still getting an education, this could be great. Examples:

- Electrician, carpenter, mechanic
- Hairdresser, chef, healthcare assistant
- EUX combines vocational training + gymnasium level subjects = opens university doors too.

👉 When to choose this?

- You like working hands-on.
- You want to get a job faster or learn a specific trade.
- You want to combine practical training with the possibility of university later (EUX).

3 Special programs

Some schools offer **international lines**, bilingual programs, or focus on arts, sports, or music. Could be interesting if you have special talents or passions!

💡 My recommendation

✓ **If you enjoy learning and want to keep your future options open:** STX or HHX

✓ **If you're passionate about technology/science:** HTX

✓ **If you like hands-on work or already have a trade in mind:** EUD or EUX

✓ **If you want to work a bit faster towards independence:** HF or EUX

Since you're fluent in Danish and have a multicultural background, you might also thrive in programs that emphasize **languages, international business, or global studies** (especially HHX or STX).

✉️ Next step for you

- Visit open houses (orienteringsaften) at local gymnasiums and vocational schools.
- Talk to a school counselor (UU-vejleder) — they can help you think through your choice.
- Consider doing a short internship or job shadowing if you're unsure!

If you tell me a bit more about what you enjoy (e.g. math, art, sports, working with people), I can give you a more tailored suggestion! Want to share that? 😊
