

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belize. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's fantastic that you're thinking carefully about your next step! Since you've just finished primary school (which in Denmark usually means *folkeskolen* up to 9th or 10th grade), you're at an important crossroads. Let's break down your options and some recommendations, based on what you've shared:

Typical paths after primary school in Denmark

Gymnasiale uddannelser (upper secondary education / high school)

These are academic programs that prepare you for university:

- **STX** (*Alment gymnasium*): General upper secondary education with a broad mix of subjects (science, languages, humanities).
- **HHX** (*Handelsgymnasium*): Focus on business, economics, and international trade.
- **HTX** (*Teknisk gymnasium*): Emphasis on technology, natural sciences, and innovation.
- **HF** (*Højere forberedelseseksamen*): A 2-year program aimed at those who want a more practical or flexible route to higher education (often for slightly older students, but possible after 10th grade).

Erhvervsuddannelser (vocational education and training, VET)

- These programs combine school and apprenticeship (praktik) with a focus on practical skills (e.g., carpenter, electrician, hairdresser, IT technician, chef).
- You earn a qualification that can lead directly to work or further study.

10th grade (optional)

- If you want an extra year to decide, mature, or improve grades, many students choose to take 10th grade (*10. klasse*), either at a regular school or at an efterskole (boarding school with a focus on personal development, sport, art, etc.).

How to choose?

Since you're fluent in Danish and have grown up in Denmark, all doors are open to you. Here are a few questions that might help narrow down your path:

- **Do you enjoy academic subjects and want to go to university later?**
→ Consider STX, HHX, or HTX depending on your interests.

- **Are you interested in practical, hands-on work and starting a career sooner?**
→ Consider a vocational program (*erhvervsuddannelse*).
 - **Are you unsure what you want and would like to try different things or gain life experience?**
→ A 10th grade or efterskole year could be valuable.
-

✨ Special tips for you

 **Your Belizean heritage could be a strength** — for example:

- HHX (with its international business focus) or STX with language options could position you for work or study abroad in the future.
- You could consider international programs (like the International Baccalaureate offered at some Danish gymnasiums), especially if you're interested in global opportunities.

 **Think about your passions** — e.g., technology, art, business, science, social studies? I can help you map these to specific programs.

✅ Next steps

- Visit open house events (*åbent hus*) at local gymnasiums or vocational schools.
 - Talk to a guidance counselor (*UU-vejleder*) — they can give you tailored advice based on your school records and interests.
 - If you want, tell me about your favorite subjects, hobbies, or dream jobs, and I can suggest more specific programs!
-

 **If you'd like, share what you enjoy most at school or what you dream of doing in the future, and I can give you a more personalized recommendation!**
