

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brazil. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps — and you're in an exciting position with a multicultural background, strong language skills, and lots of options in Denmark's educational system! Let's break this down a bit so I can give you some recommendations tailored to your situation.

Key points to consider

- ✓ You just finished primary/lower secondary school (Folkeskolen).
- ✓ You're 16, so you're at the natural point to choose upper secondary education (ungdomsuddannelse).
- ✓ You're fluent in Danish (that gives you full access to Danish education).
- ✓ You have Brazilian heritage, which could be a strength if you want to connect international or cultural aspects to your future.

Your options at this stage

In Denmark, after primary school, students usually choose one of these paths:

Gymnasiale uddannelser (General upper secondary education)

These prepare you for university. Examples:

- **STX (Alment gymnasium)** — broad academic focus; good if you enjoy subjects like languages, social studies, natural sciences.
 - **HHX (Handelsskole)** — focus on business, economics, international trade.
 - **HTX (Teknisk gymnasium)** — focus on technology, natural science, IT.
 - **HF (2-årig)** — shorter, more compact; good if you want to go to university but prefer fewer years in school.
- ✓ Good for you if:
- You want to go to university later (in Denmark or abroad).
 - You like academic learning.
 - You enjoy subjects like history, biology, maths, or languages.

2 Erhvervsuddannelser (Vocational education & training - EUD)

You combine school and apprenticeship, and you train for a specific job (e.g., carpenter, chef, graphic designer, hairdresser, mechanic).

✓ Good for you if:

- You want practical training and to start working sooner.
- You like hands-on learning.

3 Kombinationsmuligheder

There are also hybrid paths, like **EUX**, where you get both vocational training and a general upper secondary qualification, so you can both work as a skilled worker *and* go on to higher education.

💡 Questions to help decide

Here are a few things to think about:

- Do you enjoy academic subjects and studying? → Consider STX, HHX, HTX, HF.
- Do you prefer learning by doing and want to work sooner? → Consider EUD or EUX.
- Do you have a career dream already (doctor, engineer, entrepreneur, designer)?
- Do you want to study or work internationally one day? (Your Brazilian background and possible language skills could be an asset!)
- Do you have subjects or topics that excite you the most?

🌟 A recommendation

Since you are fluent in Danish, born and raised in Denmark, and have both local and international perspective, I would recommend:

👉 **If you want to keep doors open for university and a broad range of careers:**

➡ **STX or HHX** (if you're interested in languages, culture, business, or global studies, HHX might be very appealing — especially with your Brazilian roots).

👉 **If you want something more technical/science-based:**

➡ **HTX.**

👉 **If you are eager to get into a profession, but want the option of higher education later:**

➡ **EUX.**

🚀 Next steps

✓ Talk to a guidance counselor (uddannelsesvejleder) at your school or in your municipality — they can help you explore your interests.

✓ Visit some schools' open houses (orienteringsaften) — they often have them in January/February but

you can contact them anytime.

✅ Consider what subjects you enjoy most and what kind of school environment suits you.

💬 If you want, tell me:

- What subjects do you like most?
- Do you have any dream jobs or ideas for the future?
- Do you want to stay in Denmark or maybe study/work abroad?

Then I can give you an even more specific recommendation! 🚀
