

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burkina Faso. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you've finished primary school in Denmark (which usually means you've completed **folkeskole** or 9th/10th grade), you now have several options depending on your interests, strengths, and future plans.

Here's a breakdown of common educational paths in Denmark after primary school, and some guidance for choosing between them:

General upper secondary education (gymnasial uddannelse)

This is a good choice if you want to keep many doors open, possibly attend university later, or if you enjoy academic subjects.

- **STX (Studentereksamen / gymnasium)**

Focus on a broad range of academic subjects: sciences, humanities, languages, and social studies.

→ Good if you like general academic studies and want to go to university.

- **HHX (Higher Commercial Examination)**

Focus on business, economics, and international trade.

→ Good if you're interested in business, marketing, or finance.

- **HTX (Higher Technical Examination)**

Focus on science, technology, and engineering subjects.

→ Good if you enjoy math, technology, IT, or natural sciences.

- **HF (Higher Preparatory Examination)**

A shorter, more flexible program (usually 2 years) aimed at adults or those who want a faster route to higher education.

→ Good if you want to focus on fewer subjects or need a more practical approach.

Vocational education (erhvervsuddannelse / EUD / EUX)

This is a good choice if you want to combine school and practical training (apprenticeships) and get into a trade or job faster.

- **EUD:** Straightforward vocational training for a wide range of professions (e.g. carpenter, electrician, chef, hairdresser, healthcare assistant).
- **EUX:** Combines vocational training with general upper secondary education (so you can both get a trade and qualify for higher education).

➡ Good if you prefer hands-on learning, want to start working sooner, or want a mix of work and study.

✨ What should you consider?

Ask yourself:

- ✓ What subjects do I enjoy most?
 - ✓ Do I like academic study, or do I prefer practical tasks?
 - ✓ Do I want to go to university later, or would I prefer to work sooner?
 - ✓ Do I want to study something that connects to my background, such as international relations, languages, or development work?
-

💡 My recommendation

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school:

- If you're not sure yet what you want, **STX** or **HTX** could be a safe bet — they keep options open for university.
 - If you're interested in practical skills, **EUX** is a strong choice because it gives both a trade and a path to higher education.
 - If you're interested in business and maybe international work (perhaps something linking Denmark and Burkina Faso in the future?), **HHX** could be a great match.
-

🚀 Next steps

- 👉 Talk to your school counselor (UU-vejleder).
- 👉 Visit open house events at local gymnasiums and vocational schools.
- 👉 Try "brobygning" (bridging courses) to experience different schools before deciding.

If you want, tell me more about your interests — for example: Do you like math, science, art, working with people, etc.? That will help me give you a more personal recommendation!
