

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cabo Verde. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — and it's fantastic that you're thinking ahead about your future! Since you're 16 and have finished primary/lower secondary school (folkeskolen) in Denmark, you're at a key decision point. Let me outline your options and give some recommendations based on common paths and your background:

🎓 Educational Paths after Primary School in Denmark

After 9th or 10th grade, most students choose between two main directions:

1 General upper secondary education (Gymnasiale uddannelser)

This prepares you for university. Main types:

- **STX** (Almen studentereksamen) – broad focus (languages, social sciences, natural sciences, arts)
- **HHX** (Højere handelseksamen) – focus on business, economics, marketing
- **HTX** (Højere teknisk eksamen) – focus on technology, natural sciences
- **HF** (Højere forberedelseseksamen) – 2-year program, often for older students or those who want a more practical academic path

2 Vocational education and training (EUD/EUX)

This combines school and apprenticeship (praktik). You train for a specific job (e.g. carpenter, electrician, chef, healthcare assistant).

- **EUX** combines vocational training with gymnasium-level subjects, so you can go directly to university or work.

☀️ What to consider

- ✓ **Your interests and strengths** — Do you enjoy academic subjects, or do you prefer practical, hands-on work?
- ✓ **Your long-term goals** — Do you want to go to university later? Start working earlier?
- ✓ **Learning style** — Do you like theory or practice, or a mix?
- ✓ **Language skills** — Since you're fluent in Danish and likely also have Cape Verdean cultural knowledge (maybe Creole or Portuguese?), you could consider international opportunities too.

💡 Possible recommendations

👉 **If you want flexibility and like academic subjects:**

Consider **STX** if you want a broad education that keeps many doors open — e.g. social sciences, humanities, or sciences.

Or **HTX** if you like technology, IT, science, or engineering.

👉 **If you're interested in business/economics:**

HHX could be a great fit.

👉 **If you want to work with your hands or learn a trade:**

EUD or EUX would let you combine work and school — and EUX gives you the option to pursue higher education later.

 Extra thought — your background

Coming from a Cabo Verdean family, you could also think about how your education could give you international opportunities (e.g. learning more languages, studying abroad, or working in international companies).

 Next step

I recommend:

- **Visit open house events (åbent hus)** at local gymnasiums and vocational schools.
- **Talk to a guidance counselor (UU-vejleder)** — they can help you match your interests with programs.
- **Try a “brobygning” or short internship** if you're unsure.

⚡ **If you tell me more about your interests — for example, do you like science, languages, business, design, or working with people? — I can give a more specific recommendation!**

Would you like help exploring that? 😊
