

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chad. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give a thoughtful recommendation! Since you just finished primary school (in Denmark, that typically means *folkeskole* up to 9th or 10th grade), the next step is usually **youth education (ungdomsuddannelse)**. Let's look at your main options and what might suit you depending on your interests, strengths, and future plans.

Main educational paths after primary school in Denmark

Here's a summary of your main choices:

General upper secondary education (Gymnasiale uddannelser)

These are for students who want to keep their options open for university or other higher education. They focus on academic subjects.

- **STX (Almen studentereksamen)** — broad academic program (humanities, sciences, social sciences)
- **HHX (Højere handelseksamen)** — focus on business, economics, and international subjects
- **HTX (Højere teknisk eksamen)** — focus on technology, science, IT
- **HF (Højere forberedelseseksamen)** — a bit shorter (2 years), good for practical people or those who want to work with people (e.g. social, health)

Good for you if:

- You enjoy school subjects and want to go to university eventually
- You like writing, reading, science, languages, or social sciences
- You're not sure yet, but want to keep doors open

Vocational education and training (Erhvervsuddannelse / EUD / EUX)

These are for people who want to combine school and work, and get practical experience.

- **EUD** — vocational training (become a carpenter, electrician, chef, hairdresser, etc.)
- **EUX** — combines vocational training with upper secondary subjects, so you can also apply to university later

👉 Good for you if:

- You prefer learning by doing, being active
- You want to get a profession and maybe start working earlier
- You like practical skills

3 Other options

- **International programs (e.g. IB - International Baccalaureate)** if you want a global focus and study in English
- **Production schools / FGU (Forberedende grunduddannelse)** if you're not sure yet and want more time to figure it out with practical learning

☀️ What to consider when choosing

- ✓ **What subjects do you enjoy most?** Science, math, languages, arts, technical subjects?
- ✓ **Do you want to go to university one day, or start working sooner?**
- ✓ **Do you like academic study or hands-on practical work?**
- ✓ **Where do you see yourself in 5-10 years?**

📌 My recommendation (based on what you told me)

Since you're fluent in Danish and have grown up in Denmark, all options are open to you. If you are:

- **Curious about many subjects, like to keep doors open** → STX or HHX could be great.
- **Into technology, science, or IT** → HTX could suit you well.
- **Interested in business, trade, or entrepreneurship** → HHX could fit.
- **Prefer practical, hands-on learning** → EUD or EUX (maybe with a trade or field you like).

If you tell me more about your interests (e.g. what subjects you like, hobbies, what jobs you dream about), I can help narrow it down and suggest specific programs or schools near you!

Do you want help with that? 😊
