

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from China. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself! It's great that you're thinking carefully about your next steps — this is an exciting time. Let's break it down to help you reflect and make a choice that fits you.

Your options after primary school in Denmark

In Denmark, after primary school (folkeskole), most young people choose between these main educational paths:

Gymnasiale uddannelser (Upper secondary education / general upper secondary)

These prepare you for university or other higher education. The main types are:

- **STX (Alment gymnasium)** – broad academic education, with focus on humanities, social sciences, and natural sciences.
- **HHX (Handelsgymnasium)** – focuses on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – focuses on technology, science, and IT.
- **HF (Højere Forberedelseseksamen)** – shorter program (2 years), more practice-oriented, often chosen by students who want a more flexible or alternative academic path.

Erhvervsuddannelser (Vocational education and training - EUD)

These programs prepare you directly for a job (crafts, technical trades, social care, etc.), often combining school and apprenticeship in a company.

Kombinerede forløb (EUX)

A combination of vocational training and upper secondary school — you get both a vocational qualification and a university entrance qualification.

How to choose?

Here are some questions to guide your choice:

- Do you enjoy academic subjects and want to go to university later? → STX, HHX, HTX or HF could be good.
- Are you interested in practical work, learning a trade, or working while you study? → EUD or EUX could suit you.
- Do you already have a passion (e.g., science, technology, business, arts)? → Choose the gymnasium or program that focuses on that field.

- Do you prefer hands-on learning or theoretical learning?
-

Your cultural background

Your background — being fluent in Danish, born in Denmark, and with Chinese roots — is a strength! It might give you:

- Interest in international topics (e.g. business, languages, diplomacy).
- A unique perspective in fields like intercultural communication or global studies.

HHX (business-oriented) or STX (broad academic) could match well if you're considering international opportunities or university later.

My recommendation

Without knowing your specific interests yet, I'd suggest:

- 👉 **STX** if you want broad options and you're not sure yet what you want to study at university.
 - 👉 **HHX** if you have an interest in business, economics, or international trade.
 - 👉 **HTX** if you love science, technology, or IT.
 - 👉 **EUX** if you want a practical qualification but still want the option of higher education.
-

Next step

Would you like to tell me:

- What subjects do you like the most at school?
- What are your hobbies or things you're passionate about?
- Do you think you want to go to university in the future?

If you want, I can help you map out a few concrete paths and what jobs or studies they could lead to! 🚀
