

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ecuador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's wonderful that you're thinking carefully about your next steps! Since you're 16, living in Denmark, and just finished primary school (I assume you mean *folkeskole* or similar), you're at the point where you can choose between different educational paths. Let's break down your options and things to consider:

Main educational paths after primary school in Denmark

1 General upper secondary education (gymnasial uddannelse)

These programs prepare you for university. Examples:

- **STX** (studentereksamen): Broad academic program with focus on humanities, natural sciences, and social sciences.
- **HHX** (higher commercial examination): Focus on business, economics, and marketing.
- **HTX** (higher technical examination): Focus on technology and natural sciences.
- **HF** (higher preparatory examination): Shorter (2-year) program, more flexible, often chosen by people who want to apply to higher education sooner or who didn't take the standard 3-year route.

 Choose this path if you enjoy academic subjects and are considering university or professional higher education (professionsbachelor).

2 Vocational education and training (erhvervsuddannelse, EUD)

This combines school and apprenticeship (praktik). Examples:

- Electrician, carpenter, hairdresser, chef, IT-supporter, etc.
- Many EUD programs can lead directly to a career, or you can continue to *erhvervsakademi* or other higher vocational education.

 Choose this path if you want practical experience, earn while you learn, and maybe don't feel like sitting in classrooms all day.

3 Combination programs

- **EUX**: Mixes vocational training with academic subjects, so you can both get a trade and qualify for university later.

👉 Choose EUX if you want both a practical and academic foundation — it's demanding, but opens many doors.

💡 How to decide?

✅ Your interests

Do you like academic subjects, working with your hands, solving technical problems, working with people, designing things, etc.?

✅ Your strengths

Were you stronger in science, languages, math, art, or practical subjects? What did you enjoy most in school?

✅ Your future vision

Do you want to go to university? Start working sooner? Maybe start your own business one day?

✅ Cultural background advantage

Since you have Ecuadorian roots, maybe you're bilingual in Spanish or familiar with multiple cultures. This could open doors in international business, diplomacy, tourism, or teaching — consider how your background can be a strength.

🌟 My recommendation

Since you're fluent in Danish and (I assume) also connected to Spanish, you could:

- **STX** (broadest academic path, keeps many doors open, and you can combine languages + social sciences + science).
 - **HHX** (if business, marketing, economics or international trade appeal to you).
 - **EUX** (if you want a trade plus the option for higher education).
-

🌟 Next steps

- Visit uddannelsesguiden.dk and explore the programs.
 - Attend open house (Åbent Hus) at local gymnasier or erhvervsskoler.
 - Talk to a *UU-vejleder* (youth education counselor) — they can help match your interests to programs.
 - Maybe do a *brobygning* (bridge-building course) to try out different educations before deciding.
-

💬 If you tell me a bit more about what subjects you liked, what you enjoy doing, and your dreams for the future, I can give you a more personalized recommendation! Want to share?
