

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Egypt. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important question — and it's great that you're thinking ahead! Since you're 16, have completed primary (folkeskole) in Denmark, and are fluent in Danish, you have several good options. Let's break it down so you can consider what fits you best.

Main educational paths after folkeskole

In Denmark, after completing 9th or 10th grade, you can choose between these main types of upper secondary education:

Gymnasiale uddannelser (general upper secondary education)

If you're interested in going to university later, these are good options:

- **STX (Alment gymnasium)** – A broad, academic program with focus on science, humanities, social science, and languages.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, and innovation.
- **HF (Højere Forberedelseseksamen)** – A shorter, 2-year academic program, often for those who want a more practical or mature learning style.

✓ *Recommended if:* You enjoy academic subjects and think you might want to go to university (e.g. engineering, medicine, law, business, or humanities).

Erhvervsuddannelser (vocational education and training - EUD)

If you're more interested in getting practical skills and starting work sooner, you could choose a vocational track. This combines school and apprenticeship in a company (e.g. carpenter, electrician, chef, IT supporter).

✓ *Recommended if:* You like hands-on work and want to qualify for a skilled job, or maybe later move into business or entrepreneurship.

Kombinationsuddannelser (eux)

This combines vocational training with a gymnasial-level exam. You become both a skilled worker and qualify for higher education.

✓ *Recommended if:* You want both practical skills and the option for university.

Questions to ask yourself

- Do you enjoy academic subjects (math, science, languages, history)? Or do you prefer hands-on, practical work?
 - Do you want to go to university one day? Or would you rather get a job sooner?
 - Do you like working independently, or do you thrive in team settings?
 - Do you have any dream jobs in mind (engineer, doctor, designer, mechanic, chef, entrepreneur)?
-

My recommendation

👉 Since you are fluent in Danish and have a multicultural background, you could consider:

- **STX or HHX** if you like academic subjects and want to keep university options open.
- **EUX** if you want a mix of practical and academic and aren't sure yet.
- **Vocational training (EUD)** if you know you love working with your hands or in specific industries.

If you'd like, I can help:

- Make a quiz to guide your choice,
- Suggest specific programs near where you live in Denmark,
- Or draft a plan towards a specific career (e.g. engineer, business owner, IT professional).

Would you like help with that? And do you have any particular interests or career dreams already? 🚀
