

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eritrea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you've just finished primary school (I assume you mean **folkeskole**, typically completed around age 15-16 in Denmark), you have several good options. Let's break it down to help you think it through:

Common Educational Paths after Folkeskole

In Denmark, after primary/lower secondary school, students usually choose between:

✓ Gymnasiale uddannelser (Upper secondary school / high school)

- **STX (studentereksamen)** – General academic education, broad subjects (humanities, sciences, social sciences)
- **HHX (business upper secondary)** – Focus on business, economics, and marketing
- **HTX (technical upper secondary)** – Focus on technology, natural sciences, IT
- **HF (higher preparatory exam)** – Shorter (2 years), often chosen if you want a faster route or are unsure

✓ Erhvervsuddannelser (vocational education and training, EUD)

- Combines school and apprenticeship (praktik)
- Leads to jobs like electrician, carpenter, hairdresser, chef, healthcare assistant, etc.
- Can also lead to further study later

✓ Kombinerede forløb (EUX)

- Mix of vocational education + gymnasial level
- You get both a trade qualification **and** a general exam, so you can work or study at university

What to consider when choosing

Ask yourself:

- Do I enjoy academic studies (reading, writing, theory)? → Maybe STX, HHX, HTX, or HF
- Am I more practical, like working hands-on, creating things, or learning a trade? → Maybe EUD or EUX

- Do I want to go to university one day? → STX, HHX, HTX, or EUX keep that door open
- Do I have a passion already (e.g. IT, business, healthcare, design)? → Choose a path that fits

☀️ Special considerations for you

- Since you're fluent in Danish and grew up here, you have the same options as anyone else — that's a great position to be in.
- Your cultural background can be a strength — maybe you're interested in international business, languages, or helping in diverse communities?

💡 My recommendation (if you're undecided):

👉 If you like keeping doors open and aren't sure yet what you want:
STX (broad and flexible) or **EUX** (good mix of practical + academic)

👉 If you know you like business:
HHX

👉 If you like technology, science, or IT:
HTX

👉 If you prefer a faster route or had challenges in school but want to try upper secondary:
HF

👉 If you want to work sooner and like practical work:
EUD

🚀 Next steps

- Talk to a *UU-vejleder* (educational guidance counselor) — they can help you choose and even visit schools.
- Visit open houses (*åbent hus*) at local gymnasier and vocational schools.
- Try job shadowing (*praktik*) if you're interested in trades.

If you tell me a bit more about your interests (e.g. subjects you like, hobbies, future dreams), I can give a more tailored suggestion! Would you like that? 😊
