

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Estonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Since you're 16, just finished primary school (which in Denmark usually means *folkeskole*), you have several good options depending on your interests, strengths, and future plans. Let's break it down:

Typical educational paths after primary school in Denmark

Here are the main options:

Gymnasiale uddannelser (Upper secondary education / high school)

If you're interested in academics and might want to go to university later:

- **STX (Alment gymnasium)** – Broad, general education with both sciences and humanities.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international studies.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, and engineering.
- **HF (Højere Forberedelseseksamen)** – A 2-year program (often for more mature students or those who want a shorter academic track).

 *Recommended if you enjoy school subjects and see yourself going to university or higher education in the future.*

Erhvervsuddannelser (Vocational education and training - VET)

If you prefer practical learning and want to train for a specific job (e.g. carpenter, chef, electrician, IT supporter):

- Combines school periods and apprenticeship/workplace training.
- Leads directly to a profession, but you can still take further education later.

 *Recommended if you prefer hands-on learning or want to enter the workforce sooner.*

Kombineret forløb / EUX

- A combination of vocational training and general upper secondary education.
- You get both a trade qualification and the opportunity for higher education.

 *Recommended if you want the flexibility of both worlds.*

Factors to consider

What are your interests?

- Do you like sciences, languages, humanities, or hands-on work?
- Are you more motivated in school-like settings or practical environments?

Do you see yourself going to university?

- If yes, gymnasiale uddannelser (especially STX, HTX, or HHX) might be a good choice.

Do you want to work soon, or keep doors open for higher education?

- Vocational education can get you into work faster. EUX lets you do both.

Would international opportunities appeal to you?

- With your Estonian background and Danish fluency, maybe HHX (with international business focus) or STX with strong language programs could be appealing.

My suggestion based on what you've shared

Since you're fluent in Danish, born and raised in Denmark, and considering your age:

If you're not sure yet what career you want:

→ Consider **STX** (broadest general education) to keep your options open.

If you like business or international topics:

→ Consider **HHX**.

If you like tech/science and practical problem-solving:

→ Consider **HTX**.

If you want to work with your hands and learn a trade:

→ Consider an **EUD** or **EUX** program.

Final tip

 Many schools offer info meetings and open houses (*åbent hus*). Try visiting a few before you decide — this can help a lot!

If you want, tell me more about:

- Your favorite subjects in school
- Hobbies or things you're passionate about
- Whether you're interested in staying in Denmark or perhaps working/studying abroad

...and I can give you a more tailored recommendation! 😊
