

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gabon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful question — and it's great that you're reflecting on your future at this important stage! Since you've just finished primary school (in Denmark, this usually means **folkeskole**, typically around age 16), you have several options ahead of you depending on your interests, strengths, and career ambitions. Let me break it down:

Main educational options after primary school in Denmark

1 Gymnasiale uddannelser (Upper Secondary Education) — for academic focus, university preparation

- **STX (Almen studentereksamen)** – General upper secondary school with broad academic subjects (Danish, math, science, languages, social studies).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international relations.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere forberedelseksamen)** – Shorter (2-year) version, more practical and adult-oriented.

 *Best for:* If you're thinking of university or higher education later.

2 Erhvervsuddannelser (Vocational Education and Training - EUD) — for practical, job-focused learning

- Combines school and apprenticeship (praktik) at a workplace.
- Many fields: carpentry, electrician, chef, healthcare, IT, etc.
- Shorter route to job market + possibility to take "EUX" if you want vocational + academic qualifications together.

 *Best for:* If you like hands-on work and want to start earning or working sooner, but can still go to higher education via EUX.

3 Other routes

- **10th grade (10. klasse)** — Optional extra year to strengthen skills before choosing an upper secondary path.

- **International or alternative schools** — If you want an English-language education or a different educational environment.

How to decide?

Here are some things to consider:

✓ **What subjects do you enjoy most?**

Do you like languages, science, social studies, technology, art?

✓ **Do you prefer practical work or academic study?**

Do you enjoy working with your hands, solving real-world problems, or do you like reading, writing, and theory?

✓ **What are your dreams or ideas about your future job?**

Even if you're unsure, think: do you imagine yourself at university, or starting a career earlier?

✓ **Do you want flexibility to go to university later?**

Gymnasium paths and EUX leave that door wide open.

☀ **Example paths**

- **If you want to keep doors open + like academic subjects:** STX or HHX
- **If you're into science and tech:** HTX
- **If you want hands-on job training + keep academic option:** EUX
- **If you're unsure:** Consider 10th grade or visit open house events at schools to explore.

💡 **My recommendation for you**

Since you're fluent in Danish, born and raised in Denmark, and at a good decision point:

👉 **STX or HTX** could be excellent if you want broad opportunities.

👉 **EUX** is a great choice if you want a profession + the option for university.

👉 **Attend open house events (åbent hus)** to see what feels right.

If you tell me a bit more about:

✨ Your favorite subjects

✨ Whether you like schoolwork or practical work

✨ Any future dream job

... I can give you a more personalized suggestion!

Would you like that? 😊
