

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Greece. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that about yourself! Since you've just finished primary school in Denmark and are fluent in Danish, you have a variety of options available depending on your interests, strengths, and future goals. Let's walk through the main educational paths in Denmark and what might suit you:

♦ 1. Gymnasium (STX, HHX, HTX, HF)

These are upper secondary education programs that typically last 3 years (HF is 2 years) and prepare you for university. Here's a quick breakdown:

Program	Focus	Best For
STX (Alment gymnasium)	General academic subjects: humanities, science, languages	If you're unsure and want a broad foundation
HHX (Handelsskolen)	Business, economics, marketing	If you're interested in business or economics
HTX (Teknisk gymnasium)	Technology, science, IT	If you like science, technology or engineering
HF	Shorter (2 years), flexible	If you want to get to higher education quickly or need a less demanding pace

● **Recommended if:** You enjoy academic subjects, want to keep your options open, and think you might go to university later.

♦ 2. Erhvervsuddannelse (EUD – Vocational Education and Training)

These combine school and apprenticeship (praktik) and train you directly for a specific job (e.g. electrician, carpenter, hairdresser, chef, etc.). Programs usually last 3–4 years.

● **Recommended if:** You like learning by doing, want a clear job path, and maybe don't want to sit in a classroom all day.

Bonus: You can *still* go to university later through **EUX**, a version of EUD that combines vocational training with academic classes.

♦ 3. EUX (Vocational + Academic Combined)

This is a hybrid of gymnasium and vocational education. You get both a studentereksamen (like STX) and a skilled trade certificate.

● **Recommended if:** You want practical job skills but also keep the door open for higher education.

♦ 4. International Opportunities

Since you have Greek roots and are bilingual (Danish + likely Greek, and maybe English), you could look into:

- **International Baccalaureate (IB)** in Denmark – a high-level program in English that's globally recognized.
 - Later studying or working abroad (maybe in Greece or another EU country).
-

♦ What to Consider Personally:

- **Do you like school subjects like math, history, languages, or science?** → Consider **STX** or **HTX**.
 - **Are you more hands-on or practical?** → Consider **EUD** or **EUX**.
 - **Do you dream of owning a business one day?** → Look at **HHX**.
 - **Want flexibility but still maybe go to university?** → Try **HF** or **EUX**.
-

Next Step

I suggest visiting an **UU-vejledning (Ungdommens Uddannelsesvejledning)** center or their website in your local area. They offer personal guidance tailored to your interests and future dreams — and can help you find schools or training programs near you.

Would you like help with a short quiz to see what path might fit your interests best? Or do you already have some things you're interested in, like tech, health, arts, business, or something else?
