

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guyana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished **primary school** in Denmark and you're 16, you're probably considering one of the **upper secondary education options** available in the Danish education system.

Let's break it down based on your interests, strengths, and future goals.

Main Educational Paths After Primary School in Denmark

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These prepare you for higher education (university, university college, etc.).

- **STX (Studentereksamen)** – General academic focus (languages, science, humanities).
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technical/science subjects and innovation.
- **HF (Højere Forberedelseksamen)** – Shorter (2 years), more practical/academic mixed; good if you're unsure or want flexibility.

Recommended if:

You enjoy academic learning and plan to go to university later.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

You learn a trade and can start working after, or go on to further education (like **EUX**, which combines vocational + academic).

- Examples: carpenter, electrician, hairdresser, chef, IT-supporter, etc.
- **EUX** is great if you want both hands-on experience and the option to go to university later.

Recommended if:

You like learning by doing, want job skills sooner, or prefer a more practical path.

3. International Options (IB – International Baccalaureate)

If you're strong in English and want an international education, this can open doors globally.

Recommended if:

You're considering studying or working internationally in the future.

Questions to Ask Yourself

1. Do you want to go to university?

- Yes → Consider STX, HTX, HHX, or HF.
- Maybe, but I want skills too → EUX.
- No/Not sure → EUD or HF (HF is flexible).

2. What are your interests?

- Science/tech? → HTX
- Business/economy? → HHX
- Languages, social studies, arts? → STX
- Creative/hands-on work? → EUD or EUX

3. Do you learn better in a classroom or through practical work?

My Suggestion Based on Your Background

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school at age 16 (a bit later than average), I'd suggest:

► HF or EUX might be your best starting points:

- **HF** is good if you want flexibility and aren't 100% sure yet what you want to study.
- **EUX** gives you both vocational skills and the option for higher education – very useful and practical.

Next Steps

1. **Talk to an educational guidance counselor (uddannelsesvejleder)** at your local UU-center.
2. **Visit schools** offering HF, EUX, STX, etc., and see where you feel most comfortable.
3. **Think about what kind of job or life you imagine for yourself** – and choose the path that gets you closer.

If you tell me more about your interests (e.g. subjects you like, dream job, hobbies), I can help you narrow it down even further.
