

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Indonesia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — you're at an exciting point in life with many possibilities ahead. Since you've just finished primary school in Denmark (which typically ends at 9th or 10th grade depending on the school), your next step is to choose a **youth education program** ("ungdomsuddannelse").

Here are the main paths you can take in Denmark and some guidance to help you decide:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for **higher education** (like university). Ideal if you're interested in academic subjects and possibly pursuing a university degree in the future.

Main options:

- **STX (Almen studentereksamen):** Broad academic program. Good if you're interested in subjects like history, social science, languages, or science.
- **HHX (Højere handelseksamen):** Focuses on business, economics, and languages.
- **HTX (Højere teknisk eksamen):** Focuses on science, technology, and innovation.
- **HF (Højere forberedelseksamen):** Shorter (2 years), more practical, and good for those who want a more flexible academic program.

Choose this if:

- You enjoy academic subjects.
- You might want to go to university or higher education later.
- You're still figuring out your career path and want to keep options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are **hands-on programs** where you learn a trade or skill and usually do apprenticeships (praktik) in a company.

Examples:

- Electrician, carpenter, chef, mechanic, health care assistant, IT-supporter, etc.

Choose this if:

- You prefer practical work over academic study.
- You want to enter the workforce relatively quickly.

- You have a clear idea of what profession you'd like.

Some programs combine both academic and vocational aspects, such as **EUX**, which lets you get both a vocational education **and** a general upper secondary certificate.

Still unsure? Consider:

- **10th grade:** Many Danish students take an extra year in "10. klasse" to grow personally, improve academically, or explore their interests before choosing.
 - **Efterskole:** A popular Danish tradition where you live at school for a year. Many efterskoler focus on music, sports, entrepreneurship, etc.
-

How to Decide

Ask yourself:

- Do I enjoy school and academic subjects, or would I rather work with my hands or in real-world settings?
- Do I want to go to university or get a job sooner?
- What are my interests? (e.g., technology, helping people, business, arts)

You can also talk to:

- Your school's **UU-vejleder (educational and career guidance counselor)**.
 - Older students or family members about their experiences.
-

Final Tip

As someone fluent in Danish with Indonesian roots, you may also have unique strengths:

- Cultural insight and language skills — great for international careers, business, or diplomacy.
- Flexibility in identity — useful in diverse work environments.

Would you like help exploring specific careers or programs based on your interests?
