

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Israel. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16 and just finished primary school in Denmark (which typically includes *folkeskole* up to 9th or 10th grade), you're at an important transition point. You have several strong options depending on your interests, goals, and the kind of future you want.

Here are the **main educational paths** available in Denmark after primary school, along with some guidance based on different interests:

1. Gymnasiale Uddannelser (Upper Secondary Education – General)

These are good if you want to go to university later. There are four types:

A. STX (Studentereksamen)

- **Focus:** Broad academic subjects (science, humanities, languages).
- **Best for:** Those considering university but still unsure of exact field.
- **Duration:** 3 years.

B. HHX (Higher Commercial Examination Programme)

- **Focus:** Business, economics, marketing.
- **Best for:** Interested in business, trade, or entrepreneurship.
- **Duration:** 3 years.

C. HTX (Higher Technical Examination Programme)

- **Focus:** Technology, science, engineering.
- **Best for:** Future engineers, IT professionals, scientists.
- **Duration:** 3 years.

D. HF (Higher Preparatory Examination Programme)

- **Focus:** Shorter academic program, often for older students or those who didn't go the gymnasium route right away.
- **Best for:** Those wanting a quicker path to higher education or mid-level careers.
- **Duration:** 2 years.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

- **Focus:** Practical training + school. You work part-time as an apprentice.
- **Best for:** If you like hands-on work (electrician, carpenter, chef, mechanic, etc.).
- **Duration:** 3–5 years depending on program.
- **Outcome:** Skilled trade job or can lead to further study later.

3. Other Specialized Paths

- **EUX:** A combo of vocational training and a general upper secondary education (you can work and study at the same time).
- **Art schools, sports schools, etc.:** If you have a special talent.

What to consider when choosing:

Your interests:

- Do you like academic subjects or hands-on work?
- Are you curious about business, science, or arts?

Your long-term goals:

- Want to go to university?
- Prefer to work sooner and learn a profession?

Your strengths:

- Are you better at writing, solving problems, or working with your hands?

Some examples:

Goal	Recommended Path
University later, unsure of major	STX
Interested in business	HHX
Interested in engineering or IT	HTX
Want to learn a trade (e.g. carpenter, chef)	EUD
Want both trade + academic skills	EUX

Want help narrowing it down?

Let me know:

- What subjects do you enjoy most?
- Do you have any hobbies or things you're passionate about?
- Do you see yourself working with people, tech, nature, business...?

With that, I can help suggest a more tailored path for you.
