

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lao People's Democratic Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great question — and it's good that you're thinking about your future at this stage. In Denmark, after finishing **primary school (folkeskole)**, you have several educational options depending on your interests, strengths, and career goals.

Here's a breakdown of the main paths you can choose from, with recommendations based on different interests:

1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in continuing academically and possibly going to university later, this is a strong option.

Options:

- **STX (Studentereksamen):** General upper secondary – broad academic focus, ideal if you're not sure yet what you want to study.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen):** Focus on science, technology, and engineering.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), more flexible – good if you prefer a more practical approach to academic subjects.

Recommended if:

You enjoy school subjects, want to keep your options open, or are interested in going to university eventually.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you want to **learn a trade** and start working earlier, this is a good fit. You combine school and practical training (often as an apprentice).

Examples of fields:

- Electrician, plumber, carpenter
- Health care assistant
- Hairdresser, chef

- IT support, mechanic

Recommended if:

You prefer practical, hands-on learning and would like to start earning money sooner.

3. EUX – A Combination of Vocational and Academic

This is a **mix of vocational training and gymnasial level** education. You get a skilled trade qualification and also qualify for higher education.

Recommended if:

You want both practical skills and the possibility to go to university later. It's demanding but gives you many options.

How to Decide?

Ask yourself:

- Do I like academic subjects, or do I prefer practical work?
- Do I want to go to university later?
- Do I want to start working and earning earlier?
- What am I passionate or curious about?

You can also talk to a **UU-vejleder (youth guidance counselor)** in your kommune — they help students like you find the right path.

Based on What You Told Me:

You're fluent in Danish, grew up in Denmark, and just finished primary school. Here are two paths you might consider:

1. **STX or HHX** if you're still figuring out your long-term goals or want to aim for university.
2. **EUX** if you're practical but also want to keep the door open to higher education.

If you'd like, I can also help you think through your **interests, strengths, and goals** more deeply to make a more personal recommendation. Would you like to do that?
