

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liechtenstein. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about your background—it's great that you're thinking carefully about your next step. In Denmark, after completing **folkeskole (primary/lower secondary school)**, you typically have a few main paths to choose from, depending on your interests, strengths, and goals. Here's a breakdown with suggestions tailored to your situation:

1. Gymnasiale uddannelser (Upper Secondary Education)

If you're considering university in the future or enjoy academic subjects, this is a strong next step.

Options:

- **STX (Almen studentereksamen)** – Broad and academic. Ideal if you're not yet sure what to study later.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – Science, tech, and practical subjects.
- **HF (Higher Preparatory Examination)** – A 2-year option if you prefer something shorter and more flexible.

Recommended if:

- You like academic learning.
- You're thinking of going to university (e.g., in Denmark or Liechtenstein/abroad).
- You're curious about exploring different subjects before specializing.

2. Erhvervsuddannelser (Vocational Education and Training, EUD)

If you enjoy hands-on work or want to enter the job market sooner, this is a strong option.

Examples:

- Electrician
- Carpenter
- Chef
- Social and healthcare assistant

Recommended if:

- You like learning by doing (praktik/læring på arbejdsplads).
- You want to start working sooner, possibly even abroad later.

You can always build on this with **EUX** (a combined vocational and academic program), which keeps university options open too.

3. International / Cross-border Opportunities

Because you have Liechtenstein citizenship, you might have unique opportunities:

- **Explore youth education in Liechtenstein or Switzerland** – especially if you have family there or want to reconnect with your cultural roots.
- **Consider language acquisition** – German is an official language in Liechtenstein, so learning German well could open more doors (if you're not fluent already).

Recommended if:

- You're interested in international careers or studies.
- You're curious about living or studying in Liechtenstein, Austria, or Switzerland later.

Self-reflection Questions (to help decide):

- Do you enjoy schoolwork and exams, or prefer more practical learning?
- Are you more interested in science, business, humanities, arts, or technical fields?
- Do you want to go to university one day, or are you eager to work after 3-4 years?
- Do you want to live/work in Denmark long-term, or maybe in Liechtenstein?

My Suggestion (based on your profile)

Since you're fluent in Danish and just finished Danish primary school, I'd recommend:

Start with STX or HHX (especially if you're unsure and want to keep your options open) – and optionally take **German as a second/third language** to stay connected with your Liechtenstein heritage.

This gives you a **solid academic foundation**, keeps **university doors open**, and still allows you to switch direction later if you want to do something more practical.

If you'd like, I can also help you:

- Compare specific gymnasiums near where you live.
- Explore schools in Liechtenstein or Germany.
- Talk through options like EUX (if you like both hands-on and academic learning).

Let me know!
