

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Madagascar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background! You're at an exciting stage with many options in front of you. In Denmark, after finishing **primary school (folkeskole)**, students typically choose between a few different educational paths depending on their interests, strengths, and career goals.

Here's a breakdown of your main options and how you might choose between them:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're interested in going to university one day or are unsure what career you want, this is a great choice.

There are different types:

- **STX (Studentereksamen)** – Focus on general subjects like languages, social studies, science, and humanities.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – Focus on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Examination)** – A shorter, 2-year program often for students who are a bit older or want a more direct route to some higher education options.

👉 *Recommended if:* You're academically inclined, want to keep many doors open, or think university might be in your future.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you want to **start working sooner**, or like **hands-on learning**, this could be a good fit. These programs combine school and apprenticeships (praktik) and lead to a skilled trade or profession.

You can become things like:

- Carpenter, electrician, hairdresser, chef, mechanic, etc.
- Or work in health care, business, technology, etc.

There's also **EUX**, which combines vocational training with a gymnasium-level exam – perfect if you want both practical skills and the chance to go to university later.

👉 *Recommended if:* You enjoy practical work, want to earn money sooner, or like learning by doing.

💬 Some Personal Advice for You

Based on what you've said (fluent in Danish, Danish-born with Malagasy roots, just finished primary school), here are a few things to think about:

- **Do you enjoy school subjects like math, science, languages, or history?** → Then a gymnasial education (STX, HTX, HHX) is probably a strong fit.
 - **Are you more into practical, hands-on work or eager to get a job quicker?** → Then an EUD or EUX program could be a better fit.
 - **Are you still unsure?** → It's okay! You can consider **10th grade (10. klasse)** to give yourself time to explore.
-

What You Can Do Now:

- **Talk to a vejleder (educational counselor)** at your school or UU-vejledningen in your kommune.
 - **Visit open house events** at local gymnasiums and vocational schools.
 - **Try brobygning (bridge-building programs)** where you spend a few days experiencing different schools.
-

If you'd like, I can help you figure out what suits you best based on your interests or future goals. Just tell me a bit more:

- What subjects do you enjoy most?
- Do you already have an idea of a job or career you'd like?
- Do you prefer classroom learning, or hands-on activities?

I'm here to help you figure it out!
