

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malaysia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! Since you just finished primary school in Denmark and are fluent in Danish, you have several solid options ahead of you. At 16, the typical next step in Denmark's education system is to enter **youth education** (ungdomsuddannelse). Your choice depends on your interests, goals, and learning style. Here's a breakdown of your main paths:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're interested in continuing academically and maybe going to university one day, this is a strong route.

Options include:

- **STX** (Almen studentereksamen): Broad focus (sciences, languages, humanities).
- **HHX** (Højere handelseksamen): Focus on business, economics, and international studies.
- **HTX** (Højere teknisk eksamen): Focus on technology, natural sciences, and innovation.
- **HF** (Højere forberedelseseksamen): A 2-year program, more practice-oriented, good for those who want a quicker path to university or vocational training.

Recommended if: You like studying, want a broad education, or think you might want to go to university later.

♦ 2. EUD (Erhvervsuddannelse – Vocational Education and Training)

If you're more hands-on and would like to start working sooner or learn a specific trade or profession, this might suit you better.

Fields include:

- Health and care (e.g., social- og sundhedsassistent)
- Technical (e.g., electrician, carpenter, IT-supporter)
- Business (e.g., retail, administration)
- Culinary and hospitality (e.g., chef, waiter)

Recommended if: You prefer learning by doing, want a clear career path, and maybe start earning earlier.

♦ 3. EUX (A mix of vocational and general education)

This is a hybrid path that combines **vocational training** with **upper secondary school subjects**, so you can get both a trade and the option to go to university afterward.

Recommended if: You want practical skills *and* the option to study further later.

Things to Consider:

- **What do you enjoy?** (e.g., science, technology, helping people, business, creativity?)
 - **How do you learn best?** (theory vs. practice)
 - **Do you want to go to university?** (yes/no/maybe?)
-

Personal Suggestion:

Since you're fluent in Danish, born in Denmark, and have a multicultural background (Malaysian roots), you could have some unique strengths — for example, in **international business, intercultural communication, healthcare, or technology**.

If you're unsure but enjoy school and want to keep your options open:

→ **STX or HHX** could be strong choices.

If you want practical skills and a career quickly:

→ **EUD or EUX** would be good.

Would you like to tell me more about your interests or what you're good at? I can help you narrow it down further if you like!
