

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malta. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! You're at an important point in your life, and it's great that you're thinking carefully about your options. Since you've just finished primary school in Denmark and are 16 years old, you're likely at the stage of choosing between several post-primary (ungdomsuddannelse) education paths.

Here are the main options in Denmark, with some guidance based on your situation:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university.

- **STX (Almen studentereksamen):** Broad, academic program with many subjects – good if you're still figuring out what you enjoy.
- **HHX (Højere handelseksamen):** Focuses on business, economics, and languages – great if you're interested in trade, marketing, or management.
- **HTX (Højere teknisk eksamen):** Focuses on science, technology, and innovation – ideal if you like math, IT, or engineering.
- **HF (Højere forberedelseseksamen):** Shorter (2-year), often for students who prefer a different pace – more practical but still gives access to university.

Recommendation: If you enjoy academic subjects and think you might want to go to university someday, **STX, HHX, or HTX** are solid paths.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These prepare you for a trade or job directly (and often include paid apprenticeships).

- Examples: Electrician, chef, hairdresser, carpenter, IT-supporter.
- Takes 3–5 years.
- You can continue to higher education later through **EUX** or additional courses.

Recommendation: If you're more hands-on, want to start working sooner, or aren't so keen on traditional academics, a **vocational path** could be a strong and respected choice in Denmark.

💡 3. EUX – Combined Academic and Vocational Path

This is a mix of EUD and gymnasiale uddannelser. You get a skilled trade **and** the qualifications to go to university.

- Very demanding, but gives you lots of future options.
- Great if you want the flexibility of both practical and academic skills.

Recommendation: Consider **EUX** if you're hardworking, want both a trade and the chance to go to university later, and you're not sure what you want long-term.

Special note – Your Maltese background:

- If you ever want to study or work in Malta (or elsewhere in the EU), having strong Danish qualifications is already a great base.
 - You might consider **learning or improving Maltese or English** further, depending on your level – it could give you more international options.
-

My Suggestion Based on What You've Said:

Since you're fluent in Danish, born in Denmark, and seem thoughtful about your future, I'd recommend:

- **STX or HHX** if you like academics and might want to go to university (maybe even abroad).
- **EUX** if you want both a practical trade and the flexibility of higher education.

Would you like help comparing STX, HHX, and EUX in more detail? Or do you already have some interests (e.g. business, science, arts, hands-on work) that could help narrow it down?
