

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — that's a big milestone, and it's great you're thinking seriously about your next step. Since you've finished primary school in Denmark and are 16, you're at the typical age where students decide between different upper secondary education paths. Here's a clear breakdown of your main options in Denmark, along with some guidance based on different goals or interests:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are for students who may want to go to university or higher education later.

Options:

- **STX (Studentereksamen)** – Focuses on general academic subjects (literature, science, social studies). Great if you're still exploring interests.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and languages. Good if you're interested in entrepreneurship or international business.
- **HTX (Higher Technical Examination Programme)** – Focuses on science, tech, and engineering. Good if you like technology or hands-on science.
- **HF (Higher Preparatory Examination)** – Shorter (2-year) alternative, more practice-oriented. Great if you're looking for a shorter route to higher education.

● **Best if:** You enjoy studying and might want to go to university.

🔧 2. Erhvervsuddannelse (Vocational Education & Training - EUD)

This is for you if you prefer hands-on work and want to learn a trade or skill. You alternate between school and working as an apprentice in a company.

Areas include:

- Construction, electrical work
- Hairdressing, cooking, hospitality
- IT, media, design
- Health and care

● **Best if:** You like practical learning and want to start working sooner, or become very skilled in a profession.

💡 Which Path Fits You?

Here are a few questions to help you reflect:

- Do you enjoy academic subjects (like Danish, history, science)? → STX, HTX, or HF might be best.
- Are you interested in money, business, or global issues? → HHX could be a good fit.
- Are you hands-on, practical, and eager to learn a trade or skill? → EUD is ideal.
- Do you want to go to university one day? → Go with a gymnasial education.
- Are you unsure or need more time to decide? → HF is shorter and gives flexibility.

✅ Final Advice:

- **Talk to a guidance counselor (Studievejleder)** at your school or a local UU-vejledning (Ungdommens Uddannelsesvejledning). They'll help you match your interests with your options.
- **Visit schools and open house events** — you'll get a better feel for the environment.
- **Ask your parents or people you admire** — their experiences might inspire you.
- **Think long-term:** Even if you're not 100% sure now, choose a path that keeps some doors open.

If you'd like, I can help you explore specific schools or programs near where you live in Denmark — just let me know your city or region.
