

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritius. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16 and have just finished **primary school** in Denmark, it sounds like you're at the stage of choosing between different types of **youth education** ("ungdomsuddannelser")—a big and exciting decision.

Here's a breakdown of your main **educational options in Denmark** and how to think about choosing the best one for **your goals and interests**:

♦ 1. Gymnasiale uddannelser (General upper secondary education)

This is the academic route and prepares you for university.

The main options:

- **STX** (Almen studentereksamen): Broad focus on humanities, natural and social sciences.
- **HHX** (Højere handelseksamen): Focus on business, economics, and marketing.
- **HTX** (Højere teknisk eksamen): Focus on science, tech, and engineering.
- **HF** (Højere forberedelseseksamen): Shorter, more flexible 2-year program for students who want a quicker path to further education.

✓ Recommended if:

- You enjoy school subjects like math, languages, science, or social studies.
- You're thinking of going to university in the future.
- You're not yet sure what career you want, but want to keep many doors open.

♦ 2. Erhvervsuddannelser (Vocational education and training / EUD)

More hands-on and practical. You learn both at school and at a workplace.

Examples:

- Carpenter, Electrician, Hairdresser, Chef, Health care worker, IT-supporter.

✓ Recommended if:

- You want to learn a trade and start working sooner.
- You enjoy learning by doing rather than just studying theory.
- You're interested in practical careers that are in demand.

◆ 3. Kombinerede forløb (EUX)

This is a mix of academic and vocational training.

- You get both a **vocational qualification** *and* a **studentereksamen**.
- Takes a bit longer, but you can go to university *or* start a job.

✓ Recommended if:

- You like hands-on work but still want the option to study further later.
- You're hardworking and want flexibility.

◆ How to Choose?

Ask yourself these questions:

- Do I enjoy academic schoolwork or more practical activities?
- Do I want to go to university later?
- Do I want to start working soon?
- Are there subjects or jobs I already know I'm interested in?

◆ Some Advice Based on Your Background

- Since you're fluent in Danish and born here, you have full access to the system—take advantage of it.
- If your parents are from Mauritius, perhaps you speak another language too—that could be an advantage in international business, tourism, or cultural fields.
- It can be valuable to explore **career counseling (UU-vejledning)**—your local youth guidance center can help you make a personalized plan.

◆ Final Thoughts

If you're not sure yet, many students choose **STX or HF** to keep their options open. But if you already know you like practical work, going into **EUD or EUX** can get you into a career faster—and you can always study later.

Would you like help finding specific schools near where you live in Denmark? Or do you want to explore specific career ideas together?
