

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Montenegro. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — and congratulations on finishing primary school! That's a big step. In Denmark, after **folkeskolen (primary and lower secondary education)**, you have several good options depending on your interests, skills, and career goals. Here's a clear breakdown of your choices and some guidance:

🎓 Main Educational Paths After Primary School in Denmark

1. General Upper Secondary Education (Gymnasiale Uddannelser)

If you're academically inclined and possibly aiming for university later:

- **STX (Studentereksamen)** – Broad academic focus (sciences, humanities, social sciences). Good if you're unsure what you want to study later.
- **HXX (Højere Handelseksamen)** – Focus on business, economics, and international trade. Great if you like business or want to work in commerce.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and IT. Ideal if you like engineering, tech, or science.
- **HF (Højere Forberedelseksamen)** – A shorter (2-year) general upper secondary program. Often used by those who want to start working or go into practical higher education afterward.

✅ *Recommended if:* You enjoy school subjects, want to go to university, or still exploring.

2. Vocational Education and Training (Erhvervsuddannelse - EUD)

If you prefer hands-on work and want to enter the workforce more quickly:

- Combines school and apprenticeship in a real job.
- You can become a skilled worker in areas like carpentry, plumbing, health care, culinary arts, auto mechanics, etc.
- Takes 2-5 years depending on the field.

✅ *Recommended if:* You want a practical job, prefer learning by doing, or want to earn earlier.

3. Kombineret Ungdomsuddannelse (KUU) or other preparatory education

If you're not ready for upper secondary education or need more help finding your path.

✓ *Recommended if:* You're still figuring out what you want, or need a gentler transition from school to education or work.

What to Think About When Choosing

- **Interests:** What subjects or types of activities do you enjoy most?
- **Strengths:** Are you better at theoretical (academic) or practical tasks?
- **Career ideas:** Do you have a dream job or something you'd like to try?
- **Long-term goals:** Do you want to go to university, work after school, or start your own business?
- **Cultural background:** With parents from Montenegro, being bilingual and bicultural might give you advantages in international jobs, language-based careers, or business.

Suggestions Based on Your Profile

Since you're fluent in Danish, born and raised in Denmark, and have just finished primary school:

- **If you're open to academic study:** Try **STX** or **HHX**. HHX could be especially interesting if you're curious about business or international work, and it might connect well with your cultural background.
- **If you like hands-on learning:** A **vocational program** like EUD is a strong choice. Denmark has one of the best vocational systems in Europe, and skilled workers are in high demand.
- **Still unsure?** Consider an **introductory course or guidance counselor** at your local UU-vejledning (Ungdommens Uddannelsesvejledning) – they can help you map out your interests and find the right fit.

Final Tip

It's okay not to have everything figured out now. Many young people switch paths later, and Denmark's system allows for flexibility.

Would you like help making a simple plan or comparing two specific paths (like STX vs HHX, or HHX vs EUD)? I can help with that too.
