

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mozambique. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, fluent in Danish, and just finished **primary school in Denmark**, you're at an important point where you can shape your future based on your interests, goals, and strengths.

In Denmark, after primary school (folkeskole), there are **three main educational paths** you can take. Here's a breakdown of each and how to choose what might fit you best:

1. Gymnasiale uddannelser (General Upper Secondary Education)

This is the academic route, preparing you for university.

Main types:

- **STX (Studentereksamen):** General academic focus – includes humanities, science, and social studies.
- **HHX (Højere Handelseksamen):** Business and economics focus – great if you're interested in trade, business, or international work.
- **HTX (Højere Teknisk Eksamen):** Technology and science focus – for those who like engineering, IT, and science.
- **HF (Højere Forberedelseseksamen):** Shorter, 2-year program – often for people who want a faster route to higher education or need a bit more flexibility.

✓ Recommended if:

You enjoy school, academic subjects, and want to go to university or work in jobs that require a degree (like law, teaching, engineering, medicine, etc.)

2. Erhvervsuddannelser (VET – Vocational Education and Training)

This is the hands-on, job-focused route.

You learn a trade or skill and get practical experience through apprenticeships (lærepladser).

Some examples:

- Electrician
- Carpenter
- Hairdresser
- IT technician

- Healthcare worker
- Chef

✓ **Recommended if:**

You like working with your hands, want to start working earlier, or are interested in a specific trade or profession. You can also later move on to higher education if you want.

3. Kombineret forløb eller EGU (Erhvervsgrunduddannelse)

For those who may need a more flexible or practical starting point – maybe you're unsure or want a less academic beginning. It's often a mix of school and work practice.

✓ **Recommended if:**

You're not sure what to do yet or need a bit more support to find your path.

How to Choose – Ask Yourself:

- What subjects do I enjoy the most?
- Do I prefer learning from books and lectures, or by doing practical tasks?
- Do I want to go to university one day?
- Am I more interested in starting a job earlier?

Special Tip for You:

With your background (Mozambican roots + Danish upbringing), you might also consider fields where **languages, culture, and international understanding** are a strength – such as:

- **International business (HHX)**
- **Global studies (STX or HF)**
- **Social work or education (via HF or vocational paths)**
- **Diplomacy or development work (long-term via university)**

My Suggestion (Based on your situation)

If you're **open to academic study** and want to keep many doors open:

➡ **Go for STX or HHX** – especially if you're curious about the world, business, or culture.

If you prefer to **start working sooner** or have a more **hands-on learning style**:

➡ **Choose a vocational education** – maybe in IT, health, or a trade that interests you.

If you're still unsure, it's totally okay – and you can talk to an **educational advisor (UU-vejleder)** at your school or kommune. They can help you find the best path based on your interests and strengths.

Would you like help exploring a specific subject area (e.g., business, IT, health, social work) to see what fits your personality and interests?
