

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Myanmar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question—you're at a meaningful turning point in your life. Since you've just finished primary school in Denmark and are fluent in Danish, you have a lot of options available. Here's a breakdown of the main educational paths in Denmark after primary school (**folkeskole**) and some thoughts on how you might choose between them.

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic tracks that prepare you for university. There are several types:

- **STX (Almen studentereksamen):** General upper secondary. Broadest curriculum with sciences, humanities, and social studies.
- **HHX (Højere handelseksamen):** Focuses on business, economics, and languages.
- **HTX (Højere teknisk eksamen):** Emphasizes technical subjects like science, math, IT, and engineering.
- **HF (Højere forberedelseksamen):** Shorter (2 years), more practical, often for those who are unsure or want to get to university faster.

Recommended if:

You enjoy academic subjects, might want to go to university, and are curious about broad fields like science, business, or humanities.

🔧 2. Erhvervsuddannelser (VET – Vocational Education and Training)

This path trains you for a specific job or trade (e.g., carpenter, hairdresser, electrician, chef, IT support, healthcare worker). It's a mix of school and paid apprenticeships.

Recommended if:

You want to start working earlier, like practical work, and maybe don't love traditional school subjects.

💡 3. Kombinerede muligheder (Combination paths)

Some programs mix gymnasium and vocational training or prepare you for both higher education and the labor market.

- **EUX:** Combines vocational training with a more academic gymnasium-like curriculum. You can become skilled and still go to university later.

Recommended if:

You want hands-on training *and* to keep the door open for university.

Personal and Cultural Considerations

As someone with roots in Myanmar but born and raised in Denmark:

- You might consider **international or global studies**, language skills, or intercultural communication if you're interested in connecting your background with future work.
- Your **bilingual or bicultural identity** can be a strength in many fields: healthcare, teaching, social work, diplomacy, or business.
- Volunteering or working in multicultural organizations during your studies can also help guide your interests.

How to Decide

Here are a few questions to reflect on:

- Do I prefer theory or practice?
- Do I want to go to university later?
- What subjects do I enjoy most?
- What kind of job do I imagine myself doing?

And most importantly:

- **Don't stress** about making a perfect choice now. In Denmark, the system is quite flexible, and it's possible to change paths later.

Example Pathways

Interest	Suggested Path
Science & Engineering	HTX or STX
Business or Economics	HHX
Social work or Healthcare	HF or VET (e.g., SOSU)
Skilled trades or crafts	VET or EUX
Creative fields (e.g., media, design)	STX or HF, possibly with electives in arts/media
