

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nigeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, just finished primary/lower secondary school (what's known in Denmark as *folkeskole*), and are fluent in Danish, you're now at the point where you choose between different upper secondary education options. In Denmark, the choice depends a lot on your interests, strengths, and future goals—whether that's university, vocational training, or starting work earlier.

Here's a clear overview of your main options and who they suit best:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university or other higher education. There are several types:

- **STX (Alment gymnasium)** – General academic program. Good if you enjoy subjects like Danish, history, science, languages.
- **HHX (Handelsskolen)** – Focus on business, economics, and marketing. Great if you're interested in entrepreneurship or commerce.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, IT. Perfect if you're into engineering, programming, or natural sciences.
- **HF (Højere Forberedelseseksamen)** – A shorter (2-year) academic program, often for more mature students or those who want a more practical route to higher education.

Recommended if: You want to go to university or keep your options open. If you're unsure, STX is the most general and flexible.

🔧 2. EUD (Erhvervsuddannelse / Vocational Education and Training)

This combines school and hands-on experience in a company (apprenticeship). You can train for careers like:

- Electrician
- Carpenter
- Hairdresser
- Mechanic
- Social and health care assistant (SOSU)

- IT-supporter
- Chef

You earn money during the apprenticeship phase.

Recommended if: You prefer practical work and want to start earning earlier. It can also lead to further education later (e.g., *EUX* combines vocational training with academic courses).

3. **EUX (Combined Vocational + Academic Path)**

A mix of vocational training and academic subjects, giving you both a trade and access to university.

Recommended if: You want a practical job but also want to keep university as an option.

What should you consider?

- **Do you enjoy school and theory?** → Gymnasial education (STX, HHX, HTX, HF)
 - **Do you want to work with your hands or get into a trade?** → EUD or EUX
 - **Are you unsure?** → STX keeps most doors open.
 - **Do you have a specific dream?** (doctor, engineer, entrepreneur, mechanic?) → Let's talk more and I can give targeted advice.
-

Next Steps

1. **Talk to a *UU-vejleder*** (youth guidance counselor) – They help students in Denmark figure out what fits best.
 2. **Visit schools during open house events (*åbent hus*)** – See what feels right.
 3. **Try a “brobygning” program** – A short trial period in a school to test it out.
-

If you tell me more about your interests—like what subjects you enjoy, if you like working with people, computers, tools, or if you want to go to university—I can give a much more specific recommendation. Want to try that?
