

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Paraguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that helps a lot. Since you've just finished primary school in Denmark (which usually means 9th or 10th grade), you're at a key decision point. In Denmark, you have several good educational paths to choose from, depending on your interests, strengths, and career goals. Here's an overview and recommendation based on your situation:

Main Education Options After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX) – Academic Upper Secondary School

- **STX:** Focus on general subjects (humanities, sciences, social studies). Prepares for university.
- **HHX:** Focus on business, economics, and international trade. Good if you're interested in business or economics.
- **HTX:** Focus on technology and natural sciences. Ideal if you like math, IT, or engineering.

Recommended if: You enjoy academic learning and want to go to university later.

2. EUX – Combined Vocational and Academic

- Mix of **vocational training** (praktik) with **academic subjects**, so you can both work in a trade and study further.
- Good for those who want job experience *and* the option to go to university later.

Recommended if: You want both practical and academic skills, and flexibility.

3. EUD – Vocational Education and Training

- Practical job training in areas like carpentry, electrician, healthcare, cooking, etc.
- You usually become an apprentice and get paid during parts of the program.

Recommended if: You prefer hands-on learning and want to start working sooner.

My Personal Recommendation (Based on What You've Shared)

Since you're fluent in Danish, born in Denmark, and just finished folkeskole, you're fully eligible for all Danish education programs.

Without knowing your specific interests yet, **I'd recommend you consider starting with STX** (general gymnasium) **if:**

- You're unsure what career you want yet.
- You like a wide range of subjects (languages, science, history, social studies).

- You might want to go to university later.

But if you have **specific interests**, here's how to decide:

- **Love business and trade?** → HHX
 - **Interested in tech, science, or engineering?** → HTX
 - **Want to work with your hands and learn a trade?** → EUD or EUX
-

✨ **Extra Tip: Use Your Bilingual Background**

Being Danish-Paraguayan and possibly speaking Spanish or Guaraní is a strength. It could open doors in:

- **International business or diplomacy**
 - **Translation or interpretation**
 - **Education or multicultural communication**
-

✅ **What You Can Do Now**

- Visit www.ug.dk – the official site for youth education in Denmark.
 - Talk to a **UU-vejleder (youth guidance counselor)** – they can give you personalized advice.
 - Attend **open house events** at gymnasiums or vocational schools near you.
 - Ask yourself what subjects and activities you enjoy most.
-

If you tell me what subjects or hobbies you like, I can help you choose more specifically. Would you like to explore paths that lead to university, a job, or something creative?
