

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sao Tome and Principe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be — right at the start of an exciting new chapter. Since you've just finished primary school in Denmark and are considering your next steps, I'll walk you through the main educational paths available in Denmark after primary/lower secondary school (folkeskolen), and then I'll give you some personalized suggestions based on your situation.

Main Educational Paths in Denmark After 9th/10th Grade

1. Gymnasiale Uddannelser (General Upper Secondary Education) – 3 years

- These prepare you for university.
- **STX (Studentereksamen)** – More general and academic focus.
- **HHX (Higher Commercial Examination)** – Focus on business and economics.
- **HTX (Higher Technical Examination)** – Focus on technology and science.
- **HF (Higher Preparatory Examination)** – 2 years, more flexible, good for older or more practically focused students.

2. Erhvervsuddannelser (Vocational Education and Training – EUD) – 2 to 4 years

- Combines school and apprenticeship.
- Leads directly to a skilled trade (e.g., carpenter, mechanic, health care worker, hairdresser).
- You can still take further education afterward (like “EUX,” which combines vocational training with the chance to go to university).

3. 10th Grade (optional)

- Some students take an extra year to mature academically or socially.
- You can do it in regular school, a continuation school (*efterskole*), or with special focuses like sport or creativity.

☀ What to Consider When Choosing

Since you're fluent in Danish, born in Denmark, and have just completed primary school, all these options are open to you. Your choice depends on:

• What kind of learner are you?

- Do you enjoy academic subjects and want to go to university later? → Consider **STX**, **HHX**, or **HTX**.

- Do you prefer hands-on work and want to start earning earlier? → Look into **EUD** or **EUX**.
- **What are your interests?**
 - **Science/Tech** → HTX or EUX with a technical trade
 - **Business/Economy** → HHX or EUX with a business focus
 - **Creative Arts** → STX with arts/music line, or a creative efterskole
 - **Helping others (e.g., health, care)** → Vocational education in healthcare or social care
- **Still unsure?**
 - Consider **10th grade**, especially at an **efterskole**. It can give you more time to grow socially and figure out your path.

Suggested Path (Based on What You've Shared)

Since you're young, fluent in Danish, and come from a multicultural background (which is a strength!), I recommend you:

1. **Reflect on your interests** – What subjects do you like? Do you enjoy school? Do you prefer projects, discussions, practical work?
2. **Consider 10th grade** if you're unsure — especially an **efterskole** where you can grow in confidence, independence, and maybe improve English or other interests.
3. **Explore either STX or HHX** if you like school and think you may want to go to university.
 - **STX** if you like subjects like Danish, history, languages, science.
 - **HHX** if you are interested in business, marketing, finance, or international trade (your multicultural background could be a plus here!).
4. **Look at EUX** if you want to keep your options open — it mixes practical work with the chance to study further later.

Final Thought

You don't need to have your whole future figured out now. What matters is choosing a path that keeps doors open **and** fits who you are right now. If you tell me more about your interests, hobbies, or dreams, I can give you an even more tailored suggestion.

Would you like to tell me more about what you enjoy doing or what subjects you like best?
