

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sierra Leone. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting step—congratulations on finishing primary school! In Denmark, after primary school (usually after 9th or 10th grade), there are several educational paths you can take depending on your interests, strengths, and career goals.

Since you're 16 and have completed primary school, here are your main options:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are more academic and prepare you for university.

A. STX (Studentereksamen)

- **Focus:** Broad academic subjects (Danish, English, math, science, history, etc.)
- **Best for:** If you're not sure yet, or want to go to university later.
- **Duration:** 3 years

B. HHX (Higher Commercial Examination)

- **Focus:** Business, economics, international trade, marketing.
- **Best for:** If you're interested in business, economics, or entrepreneurship.
- **Duration:** 3 years

C. HTX (Higher Technical Examination)

- **Focus:** Technology, science, IT, innovation.
- **Best for:** If you like tech, science, or want to be an engineer or work in tech.
- **Duration:** 3 years

D. HF (Higher Preparatory Examination)

- **Focus:** Similar to STX, but shorter and more focused.
- **Best for:** If you want to go to university but prefer a more practical and short program.
- **Duration:** 2 years

2. Erhvervsuddannelse (Vocational Education and Training – VET)

- **Focus:** Learn a profession through a mix of school and internships (e.g., electrician, carpenter, healthcare, hairdresser, mechanic, etc.)
- **Best for:** If you want to get a job faster and work with your hands or in a practical field.
- **Duration:** 2–5 years depending on the trade

You can also combine VET with **EUX**, which adds academic subjects so you can go to university later if you want.

Which should you choose?

Ask yourself:

- Do you like studying theoretical subjects like history, math, science? → **STX, HTX, HHX, HF**
- Do you prefer hands-on learning, being active, and working in a trade? → **VET or EUX**
- Are you interested in business or tech? → **HHX or HTX**
- Are you unsure but want to keep your options open? → **STX** is a solid general path.

My Recommendation (based on what you've shared):

Since you're fluent in Danish, born in Denmark, and have cultural roots in Sierra Leone, you may have unique perspectives and strengths. If you're open to both academic and practical paths, consider:

- 1. STX or HHX** if you want to go to university one day, and you're interested in social studies, languages, or business.
- 2. EUX** if you want to learn a profession *and* keep the door open to higher education.
- 3. VET** if you're already sure you want to become, say, a mechanic, chef, or work in healthcare.

If you'd like, I can help you compare schools or programs near where you live in Denmark—just let me know your city or region. Or if you tell me more about your interests (like hobbies or dream jobs), I can narrow it down even better.
