

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Singapore. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16, just finished primary school in Denmark (which typically ends around age 15/16), and are fluent in Danish, you're at a key decision point in the Danish education system. Based on your situation, here's a breakdown of your **main educational paths** and some guidance to help you choose:

🎓 Main Options After Primary School in Denmark

1. Gymnasium (STX) – General Upper Secondary School

- **Duration:** 3 years
- **Focus:** Broad academic subjects (science, humanities, languages)
- **Good for:** If you want to go to university later
- **Why choose this?** It keeps your options open and fits students who enjoy traditional academic subjects.

2. HTX (Higher Technical Examination Programme)

- **Duration:** 3 years
- **Focus:** Technology, science, and innovation
- **Good for:** Students interested in STEM (science, tech, engineering, math) careers
- **Why choose this?** More hands-on and tech-focused than regular gymnasium.

3. HHX (Higher Commercial Examination Programme)

- **Duration:** 3 years
- **Focus:** Business, economics, marketing
- **Good for:** If you're interested in business, entrepreneurship, or economics
- **Why choose this?** Leads to both jobs and business-related university studies.

4. EUX (Vocational + Academic)

- **Duration:** ~4 years
- **Focus:** Combines vocational training with upper secondary education
- **Good for:** If you want job skills **and** the option to go to university

- **Why choose this?** More flexible – you can work or study afterward.

5. EUD (Vocational Education and Training)

- **Duration:** 2–3 years
- **Focus:** Practical training for a trade or profession (e.g. carpenter, electrician, hairdresser)
- **Good for:** If you want to enter the workforce sooner with hands-on skills
- **Why choose this?** You'll be working with real companies during your education.

How to Choose the Right Path for You

Ask yourself:

- **Do I enjoy studying academic subjects, or do I prefer hands-on learning?**
- **Do I want to go to university or start working sooner?**
- **What kind of career might I want? Tech, healthcare, business, something creative?**

Example Scenarios

- **You love science and want to be an engineer or doctor → HTX or STX**
- **You're curious about startups or business → HHX or EUX**
- **You want to start a career quickly in a specific trade → EUD**
- **You're not sure what you want yet → STX keeps the most options open**

With Your Background

Since you're from a bilingual/multicultural family, you might also consider:

- **International Baccalaureate (IB):** If you're fluent in English and want an internationally recognized diploma. It's a good option if you ever want to study or work outside Denmark or Singapore.

Final Advice

- **Visit open house events** at your local STX, HTX, HHX, etc.
- **Talk to a UU-vejleder (youth guidance counselor)** – they offer free help and career guidance in Denmark.
- **Ask friends or older students** about their experiences.

If you tell me a bit more about your interests, I can suggest more specific programs or even schools near you. Want to do that?
