

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovakia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—being bilingual with roots in Slovakia and growing up in Denmark gives you a strong cultural and linguistic foundation. Now that you've finished primary school at 16, you're at a natural transition point. In Denmark, you generally have several options after primary school (*folkeskole*), and the right path depends on your interests, strengths, and long-term goals. Here's a breakdown of your main choices:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are more academically oriented and prepare you for university.

Options:

- **STX (Almen Studentereksamen):** Broad academic focus, good for university preparation.
- **HHX (Højere Handelseksamen):** Business, economics, and language focused.
- **HTX (Højere Teknisk Eksamen):** Focus on technology and science.
- **HF (Højere Forberedelseksamen):** Shorter, 2-year program, more practical, often for those who want to start university earlier or who need a more flexible path.

Good for you if:

- You enjoy academic subjects.
- You think you might want to go to university later.
- You're still figuring out your exact career interests but want to keep doors open.

2. Erhvervsuddannelser (Vocational Education and Training, EUD)

These programs combine school and apprenticeship and prepare you for skilled trades or technical jobs.

Examples:

- Carpenter, electrician, mechanic, chef, hairdresser, IT technician, etc.

Good for you if:

- You prefer hands-on work.

- You want to start earning money sooner.
- You're interested in practical skills or specific trades.

3. EUX – A Mix of Academic and Vocational

This is a combination of EUD and the academic level of HHX/HTX. You get a trade qualification **plus** the right to apply for university.

Good for you if:

- You're interested in both practical and academic skills.
- You want to keep university as an option but also like the idea of a trade.

With Your Background

- **Fluent Danish:** You can easily follow any program in Denmark.
- **Slovak heritage:** Consider whether you might want to study, work, or live in Slovakia or elsewhere in Europe later. Being bilingual is a big advantage in international careers—especially in translation, diplomacy, business, or tourism.

How to Decide

Ask yourself:

- Do I enjoy studying, or do I prefer hands-on work?
- Am I more interested in business, science, technology, or creative fields?
- Do I want to go to university later?
- Do I want to work sooner or continue in school for a while?

Recommendation Example

Let's say:

- You enjoy school and subjects like languages or social studies → **STX or HHX** might be a good fit.
- You like technology and hands-on projects → **HTX or EUD (like IT-support or electrician)** could be great.
- You're interested in both and want to keep university as a backup → **EUX** gives the best of both worlds.

Would you like help narrowing this down based on your specific interests or strengths? Feel free to share what subjects or activities you enjoy the most.
