

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Solomon Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16 and have completed primary school in Denmark (which typically includes **Folkeskole up to 9th or 10th grade**), you're at a natural point to choose between different **youth education options (ungdomsuddannelser)**. Here's a breakdown of what's available and what might suit your interests, strengths, and future goals:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically oriented and typically last 3 years. They prepare you for university.

🧠 **If you enjoy school, studying, and want to keep your options open, consider:**

- **STX (Studentereksamen)** – Broad academic education, with both sciences, humanities, and social sciences.
- **HHX (Higher Commercial Examination)** – Focuses on business, economics, and international trade.
- **HTX (Higher Technical Examination)** – Focuses on science, tech, and innovation.
- **HF (Higher Preparatory Examination)** – A 2-year general education, often used by those who want a faster path to further education.

🟢 **Best for you if:** You're interested in going to university or want broad knowledge before deciding on a career path.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and apprenticeships and take 2-5 years depending on the program.

🔧 **You can specialize in fields like:**

- Health and social care (e.g. SOSU-assistent)
- Construction and engineering
- Mechanics, electricians, IT support
- Hospitality, retail, culinary arts

🟢 **Best for you if:** You want to get a job soon after your studies and enjoy learning by doing rather than sitting in a classroom all day.

🧡 3. Kombineret forløb (EUX)

This combines vocational training with a general upper secondary diploma.

🟢 **Best for you if:** You want to learn a trade **and** keep the option to go to university later.

? How to Decide:

Ask yourself:

- Do I like academic subjects like math, science, history, or languages?
- Do I want to go to university?
- Do I prefer working with my hands or being active?
- Do I want to start working soon and earn money?

🌍 Bonus: Your Background

Being from a Solomon Islands background in Denmark gives you a **unique perspective**—this could be a strength in:

- **International business or diplomacy (HHX or STX)**
- **Social work or education (STX or HF + university)**
- **Healthcare (SOSU or HF)**
- **Creative fields** where culture and storytelling matter

✅ My Recommendation

If you're unsure, **STX** is the safest and most flexible path, as it keeps all doors open for university or other studies later.

If you already have a specific interest (like tech, business, or hands-on work), **HTX**, **HHX**, or **EUD/EUX** could be smarter choices.

Would you like help matching this with your interests or career ideas? I can help you think through what fits you best.
