

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's good that you're thinking about your future early. In Denmark, after finishing primary school (folkeskolen), you have a few main educational paths to choose from, depending on your interests, strengths, and career goals.

Here's a breakdown of your main options:

1. Gymnasiale uddannelser (General upper secondary education)

These are the academic high schools that prepare you for university:

- **STX (Alment gymnasium):** Broad, academic focus – good if you want to keep many options open (like university studies in humanities, social sciences, or natural sciences).
- **HTX (Teknisk gymnasium):** Focus on science and technology – ideal if you like tech, engineering, or innovation.
- **HHX (Handelsgymnasium):** Focus on business, economics, and marketing – good for future business or finance careers.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), more practical – can be good if you want to go to university or vocational training later, especially if you want a slightly faster track.

♦ Recommended if:

You enjoy academic subjects, want to go to university, or are unsure and want to keep your options open.

2. Erhvervsuddannelser (Vocational education and training – EUD)

This is for you if you'd rather get practical skills and start working sooner.

You learn both at school and in a real job (apprenticeship). There are many areas, like:

- Health and social care
- Construction and mechanics
- IT and electronics
- Retail and business

You can still go to university later through **EUX**, which combines vocational training with academic subjects.

♦ **Recommended if:**

You prefer hands-on learning, want to enter the job market sooner, or know what type of job you want.

3. 10. klasse

Optional, but useful if:

- You want more time to improve grades or mature
- You're unsure what to do next
- You want to boost your chances of getting into the program you want

Some do it at their local school, others at an **efterskole** (boarding school), which can be a great social and personal experience.

Questions to ask yourself to decide:

1. Do I want to study at university one day?
 2. Do I enjoy academic subjects like math, history, science, etc.?
 3. Do I prefer learning by doing?
 4. Am I sure what I want to work with?
 5. Would I benefit from an extra year (10th grade) to grow and prepare?
-

Example paths:

- **Want to become a doctor, teacher, or engineer?** → STX or HTX
 - **Want to be a businessperson or accountant?** → HHX
 - **Want to work with your hands or in a skilled trade?** → EUD or EUX
 - **Not sure yet?** → STX or 10th grade + career counseling
-

If you tell me more about what you enjoy (school subjects, hobbies, future dreams), I can give you a more specific recommendation!
