

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sri Lanka. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school (which typically ends after 9th or 10th grade in Denmark), you're now at an important turning point where you can choose between different educational paths depending on your interests, strengths, and future goals.

Educational Options in Denmark After Primary School

Here are the main options available to you:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are more academic and prepare you for university.

Options:

- **STX (Alment Gymnasium)** – General upper secondary education with a broad focus (humanities, sciences, social sciences).
- **HHX (Handelsgymnasium)** – Focus on business, economics, and marketing.
- **HTX (Teknisk Gymnasium)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen)** – A 2-year program, often for more mature students or those who want a shorter path to further education.

Recommended if:

You enjoy academic learning and want the option to go to university later. STX is the most common and general path.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These programs combine school and work experience (praktik) and prepare you for a specific trade or profession.

Examples:

- Electrician
- Carpenter

- IT Supporter
- Health care assistant (sosu-assistent)
- Hairdresser
- Chef

Recommended if:

You prefer hands-on learning and want to get a job sooner (but you can still study further later).

3. Kombinerede forløb (EUX)

This combines vocational education **with academic subjects**, so you get both a trade qualification **and** a general exam that allows you to enter university.

Recommended if:

You want the best of both worlds: to work in a trade *and* keep the door open for higher education.

Your Background and Strengths

Being bilingual (Danish and presumably Tamil or Sinhala) and having a multicultural background can be a huge strength in fields like:

- **Health care and social work**
 - **Teaching**
 - **Translation and interpreting**
 - **IT or business in international companies**
 - **Politics or NGOs working with integration and diversity**
-

How to Decide?

Ask yourself:

- Do I enjoy academic subjects like math, science, or languages?
 - Or do I prefer working with my hands or helping people directly?
 - Do I want to go to university someday?
 - Am I ready to work soon, or do I want to study longer?
-

Suggested Next Steps

1. **Visit your local “Uddannelsesvejleder” (Education counselor)** – They can give personalized advice and help you explore.
2. **Go to open house events** at local gymnasiums and vocational schools.

3. **Try internships (brobygning)** – Short practical experiences at different schools or workplaces.
4. **Talk to family and others in your community** about what they studied and what they'd recommend.

Example Paths Based on Interests

Interest	Suggested Path
I want to go to university	STX, HTX, HHX, or HF
I love tech and hands-on work	HTX or EUX IT-supporter
I want to earn money soon	EUD (vocational path)
I'm interested in business	HHX or EUX office assistant
I enjoy helping others	STX (social science) or EUD SOSU

If you tell me more about what you like doing or subjects you're good at, I can give a more personalized suggestion!
