

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've completed primary school – congratulations! In Denmark, after primary school (folkeskole), you have a few solid options depending on your interests, goals, and learning style. Since you're 16, you're right at the stage where many students choose between different upper secondary education paths.

Here's a breakdown of your main options and when each might be a good fit:

1. Gymnasiale uddannelser (General Upper Secondary Education)

This is a common next step if you're interested in going to university in the future.

Main Types:

- **STX (Studentereksamen)** – Broad academic subjects (science, humanities, languages, etc.)
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing
- **HTX (Højere Teknisk Eksamen)** – Focus on science, tech, and innovation
- **HF (Højere Forberedelseksamen)** – A 2-year program, more flexible, for students who maybe didn't do a full 9th/10th grade or need a more mature environment

Good for you if:

- You enjoy academic subjects
- You might want to go to university later
- You're not sure what you want yet but want to keep your options open

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are job-oriented programs that combine school with apprenticeships. You can become everything from a carpenter, electrician, chef, hairdresser, or IT support technician.

Good for you if:

- You want to work with your hands or in a practical field
- You want to earn money while learning
- You're not interested in university right now

You can always take a **EUX**, which combines vocational training with subjects that qualify you for university later.

How to Decide?

Here are a few questions to ask yourself:

1. **Do I enjoy school and academic subjects?**

- Yes → Consider STX, HHX, HTX, or HF
- No or unsure → Consider EUD or EUX

2. **Do I have a specific career in mind?**

- Yes → Look into EUD or relevant HTX/HHX programs
- No → Choose a general path like STX or HF to keep your options open

3. **Do I want to go to university someday?**

- Yes → STX, HHX, HTX, or EUX are all good
 - No → EUD can get you straight into a skilled job

Final Thought

Since you're fluent in Danish, born in Denmark, and just finished school here, you have all the same opportunities as anyone else. If you're not sure, it's **totally okay to explore**. You might even be able to try a short course or internship in something that interests you before committing to a full program.

Would you like help narrowing it down based on what subjects or careers you're interested in?
