

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tuvalu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! In Denmark, after primary school (folkeskolen), you typically choose between a few different educational paths depending on your interests, strengths, and future goals. Here's a breakdown to help you decide:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in going to university later on, this is usually the best path.

Main types:

- **STX (Almen studentereksamen)**
Broad and academic, with focus on humanities, social sciences, and natural sciences.
- **HHX (Højere handelseksamen)**
Business- and economics-focused; great if you're interested in trade, marketing, or finance.
- **HTX (Højere teknisk eksamen)**
Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen)**
A 2-year option, more practical and shorter than the others. Good if you're more mature or want a quicker route to further education.

Recommended if:

- You enjoy academic subjects (like math, science, languages, history, etc.).
- You're considering university in the future.
- You're not sure exactly what you want yet but want to keep your options open.

🔧 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

This is a great choice if you prefer hands-on work and want to enter the workforce quicker.

- You train for a specific job (like electrician, carpenter, hairdresser, chef, etc.).
- Combines school and apprenticeship (praktik).
- Takes 2–5 years depending on the program.

Recommended if:

- You like working with your hands or in a practical way.
- You already know what trade or job you're interested in.
- You want to start working sooner rather than study for many years.

3. Efterskole or 10th Grade (10. klasse)

Some students choose to take a transition year.

- **Efterskole:** A one-year boarding school focusing on personal growth, social skills, and special interests (sports, music, international, etc.).
- **10th grade:** More academic; can help prepare you better if you're unsure about gymnasium or EUD.

Recommended if:

- You want more time to decide.
- You want to improve academically or socially.
- You're interested in a special hobby or want to meet new people.

So... What Should *You* Do?

Ask yourself:

- Do I enjoy learning in a classroom, or do I prefer doing practical work?
- Am I thinking about going to university one day?
- Do I already have a dream job in mind?

Based on your fluency in Danish, cultural background, and being at a transition point, here are **two recommended routes**:

If you're open to university later:

Choose STX or HHX — this keeps doors open and gives you time to decide your exact interests. HHX might be a great fit if you're interested in business, trade, or economics — skills that are valuable everywhere, including if you want to work internationally (e.g., in connection with Tuvalu or international organizations).

If you're more practical or know what job you want:

Choose EUD (vocational education) — you'll learn a trade, get paid during your apprenticeship, and you can still go on to more education later (e.g., EUX or a short-cycle higher education).

Would you like a few career/education ideas based on your interests or strengths? I can help with that too.
