

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ukraine. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that — and congratulations on finishing primary school! That's a big milestone. Since you're 16, fluent in Danish, and just completed *folkeskole* (primary and lower secondary school), you have several good options ahead in the Danish education system. Your next step depends on your interests, goals, and whether you want to focus more on academics, hands-on learning, or a combination.

Here are your main paths:

1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

If you're interested in continuing your studies at a university later, this is a good path.

Options include:

- **STX (Almen studentereksamen):** Broad and academic. Good for university paths, especially if you're still exploring subjects.
- **HTX (Teknisk studentereksamen):** Focus on science, technology, and innovation. Great if you like STEM subjects.
- **HHX (Handelsstudentereksamen):** Focus on business, economics, and marketing. Good if you're interested in entrepreneurship or commerce.
- **HF (Højere forberedelseseksamen):** Shorter (2 years), more practical, and often used for specific further education programs.

● **Recommended if:** You enjoy school and academic subjects, and might want to go to university later.

2. Erhvervsuddannelse (Vocational Education and Training – VET)

A practical education where you learn a trade and start working earlier. Includes internships with companies.

Fields include:

- Health and care (e.g. social- og sundhedsassistent)
- Technology and IT
- Construction
- Hospitality

- Retail and sales

Recommended if: You want to start working earlier, like hands-on learning, or want to become skilled in a specific trade.

3. EUX – A Mix of Vocational and Academic Education

This combines VET with general upper secondary courses, so you get both a studentereksamen and a trade qualification.

Recommended if: You want a trade, but also want the option to study at university later.

What Might Be Right for You?

Here's a way to think about it:

If you...	Then consider...
Like school subjects like languages, science, or humanities	STX or HF
Are into business, economics, or marketing	HHX
Like tech, science, or design	HTX
Want to work with your hands or in a trade (electrician, carpenter, chef, etc.)	EUD or EUX
Want both academic and vocational qualifications	EUX

Final Tips:

- **Talk to a UU-vejleder (youth education counselor)** – Every kommune has them, and they can help you understand your local options.
- **Visit open house events** at nearby schools or technical colleges.
- **Ask yourself:** Do I want more academic theory, or more real-world experience?

If you tell me more about your interests (subjects you enjoy, career dreams, hobbies), I can give a more specific recommendation!
