

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Viet Nam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it's great that you're thinking carefully about your future. In Denmark, after finishing primary school (folkeskole), you have several educational paths to choose from, depending on your interests, strengths, and long-term goals.

Here's a quick overview of your main options:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 3-year academic programs that prepare you for university. There are several types:

✅ STX (Studentereksamen)

- **Focus:** Broad academic education with humanities, sciences, and social sciences.
- **Good for:** Students who want a general academic background or are unsure what they want to study later.

✅ HHX (Higher Commercial Examination)

- **Focus:** Business, economics, marketing, and international trade.
- **Good for:** Those interested in business, entrepreneurship, or economics.

✅ HTX (Higher Technical Examination)

- **Focus:** Science, technology, engineering, and mathematics (STEM).
- **Good for:** Tech-savvy students or those interested in engineering or IT.

✅ HF (Higher Preparatory Examination)

- **Focus:** Shorter (2 years), more flexible. Often used by students who are older or want a quicker path to higher education.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- **Duration:** 3-5 years (school + apprenticeship).
- **Focus:** Learning a specific trade (e.g., electrician, carpenter, chef, healthcare assistant).
- **Good for:** Hands-on learners who want to work sooner and in a specific profession.

- You can also choose **EUX**, which combines a vocational education with a gymnasial level, so you keep the door open for university.
-

How to Choose?

Ask yourself:

1. **Do you enjoy studying academic subjects like math, languages, or science?**
 - → Go for STX, HHX, HTX, or HF.
 2. **Do you want to learn a profession and get a job faster?**
 - → Look into EUD or EUX.
 3. **Are you interested in a university degree in the future (doctor, engineer, psychologist)?**
 - → Gymnasiale uddannelser are the best path.
-

Special Considerations

- If you have an interest in **Vietnamese language or culture**, you might explore electives or later studies in international relations or Asian studies.
 - If you're interested in **business or international trade**, HHX might be a great fit — especially with your bicultural background.
-

My Suggestion (based on your situation)

Since you're fluent in Danish, born and raised in Denmark, and just finished folkeskole, you might benefit from starting with **STX** if you want to keep your options open and explore different academic areas. If you already have a strong interest in tech or business, consider **HTX** or **HHX**.

But if you're more into working hands-on or learning a trade, **EUD** or **EUX** could lead you to a skilled job quickly — and EUX even lets you keep the option to study at university later.

If you want, I can help you compare specific schools or programs near where you live in Denmark. Just let me know your city or area.
