

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Yemen. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're at an exciting point in life with a lot of good options ahead. In Denmark, after finishing primary school (9. klasse or 10. klasse), you typically have a few main educational paths to choose from. The right path depends on your interests, strengths, and goals.

Here's a breakdown of the main options and who they suit best:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 2-3 year programs that prepare you for university or higher education. Choose this path if you're academically strong and want to keep your options open for future studies.

Main types:

- **STX (Studentereksamen)** – broad academic subjects (good if you're not sure yet what you want to study).
- **HHX (Higher Commercial Examination)** – focused on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – focused on science, tech, and innovation.
- **HF (Higher Preparatory Examination)** – shorter (2 years), more flexible, often for those who want to start uni faster.

Recommended if:

You enjoy school subjects and want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training / EUD)

These programs combine school with practical apprenticeships. You graduate with skills that qualify you for specific jobs, and you can also continue later with more education if you want.

Examples of careers:

- Electrician
- Carpenter
- Hairdresser
- Chef
- IT support
- Social and healthcare assistant

Recommended if:

You prefer hands-on work and want to get into the job market faster.

What to Consider When Choosing

1. **What subjects do you like most?** (Math, languages, science, hands-on work?)
 2. **Do you want to go to university later, or start working sooner?**
 3. **Do you like school as it is now, or would you rather be more practical and active?**
 4. **Do you have a dream job or something you're curious about?**
-

Advice Based on Your Background

- Being fluent in Danish is a huge strength.
 - If you're open to new ideas, a **STX** or **HHX** could keep a lot of doors open — especially if you're not 100% sure yet.
 - If you like practical skills or want to get into the workforce sooner, a **vocational program (EUD)** is a solid and respected option in Denmark.
 - If you're academically motivated and think about university, the gymnasiale route is the best foundation.
-

Bonus Option: Kombineret Forløb / EUX

EUX combines **vocational training** with **academic studies**, so you get both a trade and the right to go to university later. Great if you're unsure and want flexibility.

Final Tip:

Before you decide, visit **UddannelsesGuiden.dk** and consider going to **open house events** or talking to a guidance counselor (studievejleder) at your local "Ungdommens Uddannelsesvejledning" (UU).

If you tell me what subjects or careers interest you, I can give you more personalized suggestions.
