

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Afghanistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself—that helps me give you thoughtful advice! Since you've just finished primary school (which in Denmark is typically **9th or 10th grade in folkeskole**), your next step depends on your interests, strengths, and goals. Let's look at the main paths available in Denmark, and I'll suggest how you might choose among them:

1 Gymnasiale uddannelser (General upper secondary education)

If you enjoy academic subjects and might want to go to university later, these options could suit you:

- **STX (studentereksamen)** – Broad academic program (humanities, sciences, languages)
- **HHX (higher commercial exam)** – Focus on business, economics, and marketing
- **HTX (higher technical exam)** – Emphasis on technology, science, and IT
- **HF (higher preparatory exam)** – Shorter (2 years), good if you want flexibility or weren't fond of school but still want university access

 *Recommended if:*

You like academic studies, want to keep many doors open, or are thinking about a university degree later (e.g. law, medicine, engineering, business).

2 Erhvervsuddannelser (Vocational education and training)

These combine school and apprenticeship. You learn a trade or craft and work with a company.

- Examples: electrician, carpenter, hairdresser, IT-supporter, chef, social and healthcare assistant

 *Recommended if:*

You want to work with your hands, like practical learning, or are eager to enter the job market faster (often after 3–4 years, with good job prospects).

3 Andre muligheder (Other options)

- **Kombineret forløb (EGU, EUX)** – Mix of vocational + academic (EUX gives both a vocational qualification *and* university entrance exam)
- **International programs** – If you're interested in an international career, or strengthening English

- **10th grade (optional)** – If you want more time to mature, improve grades, or decide

✨ How to decide?

Here's how you could reflect:

- ✓ What subjects or activities excite you most?
- ✓ Do you prefer practical work or theoretical study?
- ✓ Are you already dreaming about a specific career?
- ✓ Do you want to study at university later, or work sooner?

💡 Example paths based on interests

Interest	Possible path
Business, economics, entrepreneurship	HHX
Technology, science, IT	HTX or EUX technical
Art, humanities, languages	STX
Healthcare, teaching, social work	STX, HF, or relevant vocational
Craft, design, practical skills	Vocational school (erhvervsuddannelse)

🌱 My advice for you

Since you're fluent in Danish, born and raised here, and just starting out:

- **Talk to your school counselor (UU-vejleder)** — they can guide you through local options.
- **Consider visiting open house events at gymnasiums and vocational schools.**
- **Choose what excites you, not just what others expect.**
- If you're unsure, **10th grade or EUX** can buy you time and flexibility.

If you'd like, tell me:

- 👉 What subjects or activities do you enjoy most?
- 👉 Do you have any career ideas?

That way, I can give you an even better recommendation! ✨
