

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Albania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself—that gives me a good basis for advising you thoughtfully! Since you're 16 and have completed primary school in Denmark, you're at an important decision point. Let's break down your options and factors you might consider.

Educational Paths After Primary School in Denmark

In Denmark, after finishing primary school (folkeskole, 9th or 10th grade), you generally choose between:

General Upper Secondary Education

These programs prepare you for higher education (university, etc.).

- **STX (Studentereksamen)** — Focuses on a broad academic curriculum with subjects like languages, science, humanities, and arts.
- **HHX (Higher Commercial Examination)** — Focuses on business, economics, and international subjects.
- **HTX (Higher Technical Examination)** — Focuses on technology, natural sciences, and technical subjects.
- **IB (International Baccalaureate)** — Taught in English, internationally recognized, good if you're thinking of studying abroad in the future.

Good if:

You like academic study, want to keep your options open for university, or are interested in specific areas like science, business, or technology.

Vocational Education and Training (EUD / EUX)

Combines school and apprenticeship in a company. You earn a qualification for a specific trade (e.g., electrician, carpenter, chef, hairdresser).

- **EUX** combines vocational training with upper secondary academic subjects. It allows you to both get a trade qualification *and* the possibility to go to university.

✓ Good if:

You like practical, hands-on learning; want to start earning earlier; or want a direct path into a profession (but EUX also keeps university options open).

3 Other Paths

- **10th grade (efterskole / continuation school):** A chance to mature, improve grades, explore interests (often with a focus like sports, music, outdoor life).
- **Private options / alternative education:** Some choose international schools, creative schools, or specialized academies.

🔑 How to Decide?

Ask yourself:

- **What subjects or activities do I enjoy most?** (e.g., science, arts, business, practical work)
- **Do I prefer theoretical study or hands-on work?**
- **Do I want to go to university, or would I rather start working sooner?**
- **Am I interested in an international career?**

☀️ Special Consideration

Since you're bilingual (Danish + Albanian) and perhaps have cultural ties to both Denmark and Albania, you might:

- Be well-suited for international programs (IB, HHX with international business focus).
- Have strengths in language-related or cross-cultural fields (e.g., communication, diplomacy, international business).

👉 My Recommendation (based on what you've shared)

- ✓ **If you like academic work and want to keep doors open for university** → Consider **STX** or **HHX** (if business interests you).
- ✓ **If you're more hands-on or want both a trade + university option** → **EUX** is a great balance.
- ✓ **If you're unsure and want time to grow personally and academically** → A **10th grade year** at an efterskole could be valuable.

If you'd like, tell me:

- What subjects or hobbies you like best?
- Whether you have a dream job in mind?
- How you feel about school so far (do you like studying, or prefer more practical tasks)?

I can then tailor the advice even more specifically for you! 😊
