

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's really good that you're thinking carefully about your future! Since you're 16 and just finished primary school (which in Denmark usually means folkeskole or similar), you're at a key decision point. Let's break it down so you can choose what suits your interests, strengths, and goals.

Typical options after primary school in Denmark

In Denmark, after 9th or 10th grade, you can choose between different upper secondary education paths:

1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (university, academy professions, etc.)

- **STX (Alment gymnasium)** – Focus on general subjects (science, languages, humanities, arts)
- **HHX (Handelsskole)** – Business, economics, marketing
- **HTX (Teknisk gymnasium)** – Technology, science, engineering
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), for those wanting faster access to higher education

 *Good if you want to keep doors open for university or professional bachelor's studies.*

2 Erhvervsuddannelser (Vocational education and training - VET / EUD)

- Combines school and apprenticeship
- Leads to a skilled trade (e.g. electrician, carpenter, hairdresser, chef, healthcare assistant)
- You earn while you learn (apprenticeship salary)

 *Great if you prefer hands-on learning and want to work soon or do a vocational bachelor later.*

3 Kombinerede forløb

- **EUX:** Combines vocational training with gymnasium-level courses so you can work or go to university

 *Best of both worlds if you want both practical skills and the option for higher education.*

☀️ How to choose?

Ask yourself:

- ✓ What subjects do I enjoy the most?
- ✓ Do I prefer academic work or practical, hands-on tasks?
- ✓ Am I aiming for university, college, or working sooner?
- ✓ Do I want to specialize already or keep my options open?

💡 Example paths based on different interests

Your interest	Recommended path
Science / languages / social studies	STX
Business / economics / marketing	HHX
Technology / engineering	HTX
Get a skilled job soon (hands-on learning)	EUD
Want both practical job skills + uni access	EUX
Want shorter, practical upper secondary	HF

📝 What you could do next

- Talk to a guidance counselor (UU-vejleder) — they can help you map out your options
- Visit open house events at local schools
- Try internships or short work experiences if you're unsure
- Discuss with your family — your background and values might help shape your choice

If you tell me more about your interests (e.g. subjects you liked most, whether you want to work soon or study longer), I can help make a more personalized recommendation! Would you like that?
