

Uddannelsesvejledning efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's wonderful that you're already planning your next steps! Since you're 16 and have finished primary school (or **folkeskole**) in Denmark, you're at a stage where you can choose between different upper secondary education paths depending on your interests, strengths, and future goals. Let's break down your options and what might suit you:

Main educational paths after folkeskole in Denmark

Here are the most common options:

1 STX (Studentereksamen / General Upper Secondary School)

- Focus: Broad academic subjects (humanities, science, social science, languages).
- Best for: If you're aiming for university later but don't yet know your specific interest.
- Good if you enjoy subjects like Danish, history, math, natural sciences, languages.

2 HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing, international trade.
- Best for: If you're interested in business, entrepreneurship, economics, or working in companies.
- Good if you see yourself working with business or possibly starting your own company.

3 HTX (Higher Technical Examination)

- Focus: Technology, science, IT, engineering.
- Best for: If you enjoy math, physics, technology, programming, or design.
- Great if you're curious about innovation, science, or tech development.

4 HF (Higher Preparatory Examination)

- Focus: Shorter, more practical/academic mix; 2 years instead of 3.
- Best for: If you want a shorter route, or need a more flexible academic program (sometimes people who didn't thrive in folkeskole choose this).
- Good for preparing for certain professional bachelor programs.

5 EUD / EUX (Vocational education and training / Vocational + academic combo)

- Focus: Apprenticeships + practical skills (e.g. electrician, carpenter, chef, IT technician).
- EUX combines practical training with academic subjects so you can both work and have the option for higher education later.
- Best for: If you like learning by doing, want to start working earlier, or want a direct job qualification.

☀ What to consider when choosing?

- ✓ **Your interests** – Do you like theoretical subjects or practical hands-on learning?
- ✓ **Your strengths** – Are you stronger in languages, science, math, social science?
- ✓ **Your future dreams** – Do you see yourself working with people, business, technology, or crafts?
- ✓ **Do you want to go to university?** – If yes, STX, HHX, HTX, or EUX are good routes.

📌 Example paths based on common interests

- You love science/tech → HTX
- You're business-minded or want international opportunities → HHX
- You're not sure and want broad options → STX
- You want to start a career earlier or love working with your hands → EUD or EUX

💡 My recommendation

Since you're fluent in Danish and have both Danish and Algerian background, you might have unique strengths in languages, cross-cultural understanding, and adaptability.

👉 **If you enjoy academic subjects and want to keep doors open: STX or HHX would be great choices.**

👉 **If you're drawn to technology, engineering, or design: HTX could be fantastic.**

👉 **If you want to combine practical learning with an option for higher education: EUX is very smart.**

🎯 Next steps

- Visit uddannelsesguiden.dk (UG.dk) and try their guidance tests.
- Attend open house events at local schools (gymnasium, erhvervsskole).
- Talk to an educational counselor at *UU-vejledning* in your area — they can help you plan.

👉 **If you tell me more about what subjects you enjoy or what careers you're curious about, I can give an even more tailored recommendation!**

Would you like help exploring specific careers or programs? 🚀
