

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Angola. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and it's wonderful that you're thinking carefully about your next steps! Let's break it down so you can choose an educational path that fits your strengths, interests, and goals. I'll also factor in the Danish education system and your background.

Educational options after primary school (folkeskolen) in Denmark

After primary school, you generally have these main options:

Gymnasiale uddannelser (Upper secondary general education)

- **STX** (Alment gymnasium): Broad academic program, good if you're interested in university later.
- **HHX** (Business-oriented gymnasium): Focus on business, economics, and international studies.
- **HTX** (Technical gymnasium): Focus on science, technology, and design.
- **HF** (Shorter, more flexible upper secondary): Often chosen by those who want to move faster toward higher education or need a more practice-oriented path.

 *Good for:* If you think you might want to go to university (university college or full university), or want to keep your options open.

Erhvervsuddannelser (Vocational education and training, EUD/EGU)

- Combines school with apprenticeships at workplaces.
- Leads to skilled trades (e.g. electrician, carpenter, hairdresser, IT support, health care assistant).

 *Good for:* If you prefer practical learning, want to get into the job market faster, and like working with your hands or with people.

Kombinationsuddannelser (Combination programs)

- **EUX:** A mix of vocational training and upper secondary academic education.
You get both a skilled trade certificate and the option to continue to higher education.

 *Good for:* If you want a profession and want to keep the door open to higher education.

How to choose?

Since you're fluent in Danish and grew up in Denmark, you have the same access and possibilities as any Danish citizen.

Consider:

- **What subjects do you like?** (Math? Science? Languages? Arts? Business?)
- **Do you like theoretical studies or practical work?**
- **Do you want to go to university eventually?**
- **Do you want to work soon and gain independence?**

✨ Example paths based on different interests

Interest	Suggested Path
Science / tech	HTX or STX with science focus
Business / economics	HHX
Humanities / social science	STX
Practical / hands-on work	EUD or EUX
Mix of hands-on + academic	EUX
Want to decide later	STX (most general option)

🎯 Recommendation

Since you're still exploring, I would suggest:

- 👉 **STX or EUX**, because they give you flexibility.
- 👉 Visit **uddannelsesmesser** (education fairs) or **efterskole visits** if you're interested.
- 👉 Talk to a guidance counselor (**UU-vejleder**) — they can help tailor advice to your profile.

If you'd like, I can help you:

- ✅ Identify your interests with a simple questionnaire
- ✅ Compare specific programs or schools in your area
- ✅ Draft a plan for the next few years

Would you like help with that? 😊
