

Uddannelsesmuligheder efter grundskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Antigua and Barbuda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's wonderful that you're thinking carefully about your future! Since you've just finished primary school (which in Denmark typically ends at grade 9 or 10), you have several educational paths to choose from. I'll break them down and offer advice depending on your interests and goals.

☀ Main options after primary school in Denmark

1 Gymnasium / STX (Studentereksamen)

- Focus: Broad academic education with subjects like languages, history, social sciences, natural sciences.
- Best if: You want to keep your options open for university later, enjoy academic subjects, or are not sure what you want yet.

2 HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing, international trade.
- Best if: You're interested in business, economics, or entrepreneurship.

3 HTX (Higher Technical Examination)

- Focus: Technology, natural sciences, engineering, IT.
- Best if: You like science, technology, math, or want to pursue engineering or tech-related fields.

4 EUD / EUX (Vocational education and training / combined vocational + academic education)

- Focus: Apprenticeships, practical skills (e.g. carpenter, electrician, chef, mechanic).
- EUX gives you both a trade qualification and a general upper secondary exam.
- Best if: You prefer hands-on work, want to start earning earlier, or are interested in a trade or craft.

5 Other options

- International programs (if you're interested in combining your Danish and Caribbean background with international studies)
- Folk high school (højskole) – can be a gap year option for personal development.

Considering your background

✓ **You're fluent in Danish** — great, that gives you access to all these programs without language barriers.

✓ **Antigua and Barbuda heritage** — maybe you're interested in international relations, tourism, culture, or languages? HHX or STX with language focus could be interesting if you want to connect Denmark and the Caribbean in your future career.

How to choose?

Here's what I recommend:

- 👉 Think about what subjects you enjoy the most in school.
- 👉 Consider whether you prefer theoretical learning (gymnasium) or more practical/hands-on work (EUD/EUX).
- 👉 Visit open house events (åbent hus) at local schools — it's a great way to get a feel for each type of education.
- 👉 Talk to your school counselor (studievejleder) — they can help guide you based on your grades, interests, and ambitions.

⚡ Example pathways

- **If you enjoy sciences / tech** → HTX
- **If you like languages, history, broad academics** → STX
- **If you want to work in business or start a company** → HHX
- **If you want to learn a trade + maybe also go to university** → EUX
- **If you want to focus on a trade and start working sooner** → EUD

💡 **Final tip:** Since you're 16, you have time to explore. If you're unsure, STX or EUX are good ways to keep your options open for both university and practical work later.

If you want, tell me about your favorite subjects, hobbies, or career dreams — and I can help tailor the advice further! 🚀
