

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — it's wonderful that you're thinking carefully about your future! Let's break it down so you can make an informed choice that fits your interests, strengths, and ambitions.

Overview of your options in Denmark after primary school

Since you finished primary school (folkeskole), you typically have these main pathways:

1 Gymnasiale uddannelser (General upper secondary education) – if you want to keep your options open for university or higher education later.

- **STX (Almen studentereksamen)** – broad academic focus: humanities, science, and social science.
- **HHX (Højere handelseksamen)** – business, economics, marketing focus.
- **HTX (Højere teknisk eksamen)** – technology, natural sciences, engineering.
- **HF (Højere forberedelseeksamen)** – shorter (2 years), more practical/theoretical mix, often for those who want to start higher education sooner or are more mature students.

2 Erhvervsuddannelser (Vocational education and training, VET) – if you're interested in learning a trade or profession while working in a company (apprenticeships + school).

- Examples: electrician, carpenter, chef, IT supporter, social and health care worker.

3 Kombinationsforløb (Combined programs) – like EUX, where you get both a vocational education and the possibility to study further (dual qualification).

How to choose? Some questions to consider

- ✓ What subjects do you enjoy most (e.g., science, languages, business, arts, technology)?
- ✓ Do you prefer academic learning, or do you like working hands-on and gaining practical experience?
- ✓ Do you already have a career dream (e.g., doctor, engineer, entrepreneur, graphic designer)?
- ✓ Are you motivated by projects, teamwork, or independent study?

Example recommendations based on common interests

- **If you enjoy broad academic subjects and are unsure yet:** STX keeps many doors open.

- **If you like business, marketing, or international trade:** HHX could be a strong fit.
- **If you're into technology, science, or engineering:** HTX offers great preparation.
- **If you want to work while learning a profession:** a vocational education or EUX could be perfect — you can even continue to higher education later.
- **If you prefer a shorter upper secondary education and want to get to higher education faster:** HF might suit you.

Special note: Armenian background

Your bilingual/bicultural experience is an asset! You could consider paths where language, culture, or international focus matter (e.g., STX with language line, HHX with international profile).

What I suggest

- 👉 Start by reflecting on what excites and motivates you.
- 👉 Visit uddannelsesguiden.dk (UG.dk) to explore programs and maybe try their “interesseguide.”
- 👉 Visit open houses (åbent hus) at schools to feel the atmosphere.
- 👉 Talk to a guidance counselor (studievejleder) — they can help tailor advice to you.

If you tell me more about your interests or future ideas (e.g., “I like biology and helping people” or “I want to start a business”), I can give more specific recommendations!

Would you like help figuring that out? 😊
