

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps! Since you've just finished primary school in Denmark (which means *folkeskole* up to 9th or 10th grade), you're at an exciting point where you can choose between several paths depending on your interests, strengths, and future goals. Let's break down your options and what might suit you:

Main educational paths in Denmark after primary school

1 Gymnasiale uddannelser (Upper Secondary Education)

- These are academically focused and prepare you for university.
- Examples:
 - **STX (Alment Gymnasium)** – General upper secondary school with broad subjects (science, humanities, social science).
 - **HHX (Handelsgymnasium)** – Focus on business, economics, marketing.
 - **HTX (Teknisk Gymnasium)** – Focus on technology, natural sciences, and technical subjects.
 - **HF (Højere Forberedelseseksamen)** – Shorter, 2-year program (often for adults or those wanting a shorter route to higher ed).

 *Recommended if:*

You enjoy academic subjects, want to keep many options open for university, and like studying theory.

2 Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship.
- You get trained for a specific job (e.g. carpenter, chef, electrician, hairdresser, IT support).
- You earn while you learn during apprenticeship periods.

 *Recommended if:*

You want to start working sooner, like practical hands-on learning, or are interested in a specific trade.

3 Kombinerede veje (e.g. EUX)

- Vocational training + academic subjects = both a trade qualification and a gymnasium-level exam.

- You can go directly to work *or* continue to university.

👉 *Recommended if:*

You want the flexibility to have a trade but also keep university as an option.

✅ What to consider when choosing

- What subjects do you enjoy most? (e.g. languages, science, math, technology, social studies?)
- Do you prefer theory or practical tasks?
- Do you want to go to university later, or are you more interested in getting a job after your next education?
- Where do you see yourself in 5-10 years? (It's okay if you don't know yet!)
- Do you want international opportunities? (e.g. some programs have exchange options)

☀️ Example recommendations

- **If you like languages, history, or social sciences:** STX with focus on humanities or social sciences.
- **If you're into business, marketing, or economics:** HHX.
- **If you love technology, engineering, science:** HTX.
- **If you prefer hands-on learning and want a job sooner:** EUD or EUX.
- **If you want flexibility and don't want to choose yet:** STX or EUX.

💡 Other tips

- Visit open house events (*informationsmøder*) at local gymnasiums and vocational schools to get a feel for them.
- Talk to your school's *uddannelsesvejleder* (education counselor) — they can help match your interests to programs.
- Consider a *brobygning* (bridging course) or *praktik* (short internship) if you're unsure — they let you try before you decide.

👉 If you want, tell me:

- What are your favorite subjects?
- Do you prefer practical or theoretical work?
- Do you think you want university later?

Then I can give you a more personalized recommendation!
