

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Armenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your future! Since you've finished primary school in Denmark at 16, you're now at an important decision point. Let's break it down so you can make a choice that suits your interests, strengths, and goals.

What are your options in Denmark?

After primary school (folkeskole), you typically choose between:

1 General upper secondary education (Gymnasiale uddannelser)

- **STX (Alment gymnasium)** – broad academic education; good if you want to keep many doors open for university.
- **HHX (Handelsgymnasium)** – focus on business, economics, marketing.
- **HTX (Teknisk gymnasium)** – focus on technology, science, engineering.
- **HF (Højere forberedelseseksamen)** – 2-year program, often for students who want a faster route to further education.

2 Vocational education and training (Erhvervsuddannelse / EUD)

- Combines school and apprenticeship (praktik) in a company.
- Prepares you directly for a trade or craft (e.g. carpenter, chef, hairdresser, IT technician).

3 Other paths

- **International Baccalaureate (IB)** if you like studying in English and want an international profile.
- **Efterskole or højskole** for personal development before choosing a formal education.
- **10th grade (10. klasse)** if you want an extra year to decide or strengthen certain subjects.

How to choose?

Here are some questions to reflect on:

- Do you enjoy academic subjects and want to go to university? → Consider **STX, HHX, HTX or IB**.
- Are you more interested in practical, hands-on work? → Look at **EUD**.

- Do you have a clear career goal (e.g. engineer, doctor, carpenter, entrepreneur)? → Choose the path that aligns best.
 - Are you still unsure? → 10th grade or an efterskole could give you time to explore.
-

🌟 Some advice

- ✅ Since you're fluent in Danish and have a multicultural background, you could also think about international careers or studies later — IB or STX could be helpful.
 - ✅ If you like math, science, or technology → HTX might suit you.
 - ✅ If you're interested in business → HHX can give you a head start.
 - ✅ If you like working with your hands or want to enter the workforce sooner → EUD can be a great and respected choice.
-

👉 Next step:

If you tell me about:

- Your favourite subjects,
- What you like doing in your free time,
- Any future dream job or interest,

I can help recommend a more specific path!

Would you like to share that? 😊
