

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Australia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Let's break it down so you can make a well-informed choice.

📌 Where you are now

- You're 16 and have completed primary and lower secondary school (which in Denmark usually means *folkeskole* or equivalent).
- You're fluent in Danish and have a multicultural background (Danish + Australian).
- You're at a stage where most Danish students choose between different upper secondary education paths.

🇩🇰 Common educational paths after folkeskole in Denmark

Here's a quick overview of your options:

1 Gymnasiale uddannelser (General upper secondary education)

- **STX (Alment gymnasium)** – Broad academic focus (languages, sciences, humanities).
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, and IT.
- **HF (Højere forberedelseseksamen)** – A 2-year academic program (often for those who prefer a shorter academic path or a more practice-oriented style).

👉 These programs prepare you for university or higher education.

2 Erhvervsuddannelse (Vocational education and training - EUD)

- Combines school with paid apprenticeships.
- Prepares you directly for a trade or profession (e.g. carpenter, chef, electrician, health care assistant).

👉 You can also choose *EUX*, which combines vocational training with a gymnasial exam, so you keep the door open for higher education.

Factors to consider given your situation

- ✓ **Your interests:** Do you enjoy academic subjects (science, languages, humanities)? Or are you more hands-on and practical?
 - ✓ **Future plans:** Are you interested in studying at university in Denmark or abroad (maybe Australia)? Then a gymnasial program (STX, HHX, HTX, HF, EUD) might be best.
 - ✓ **Language & international angle:** With your Australian background, you might find HHX appealing because of its focus on business and international topics, or STX with strong language options.
 - ✓ **Learning style:** Do you prefer classroom learning or more practical, real-world learning (like in EUD/EUX)?
-

My recommendation

Since you are fluent in Danish, have an international family background, and are exploring options:

- **If you like academic subjects and want to keep doors open:** Consider **STX** (broadest academically) or **HHX** (good if you're interested in business, economics, or international studies). Both prepare you well for university — in Denmark, Australia, or elsewhere.
 - **If you like hands-on learning but want the option for higher education:** Consider **EUX** — a great combination of vocational training with academic qualifications.
 - **If you're eager to start a career and learn a trade:** Go for **EUD**, especially if you have a specific passion (like IT, culinary arts, mechanics, design, etc.).
-

Final tip:

It's very common in Denmark to visit *uddannelsesmesser* (education fairs), talk to guidance counsellors (*UU-vejleder*), or do trial days (*brobygning*) at different schools. I recommend you try that — it can really help you get a feel for what fits you best!

👉 **If you tell me a bit more about your interests (e.g., subjects you enjoy, dream jobs, hobbies), I can give a more personalized recommendation!**
